**Chair** Galen Cranz, 1998 Traces the history of the chair and provides guidelines to assist the reader in choosing a chair that suits one's body **The Chair** Galen Cranz, 1998 *MISPERFORMANCE : essays in shifting perspectives* Marin Blažević, Lada Tale Feldman, 2014-07-02 *MISperformance* essays in shifting perspectives is a collection of essays that address a spectrum of cultural organizational technological ecological political and daily performances by focusing on the causes and consequences of a misfire misconception misrecognition misnaming misfitting etc Aspects and impacts of MISperformance that are susceptible to provoking disturbances distortions alternations abortions if not disasters within diverse spheres of private and social life including aesthetic and political practices are investigated in the light of their potentially both regressive even tragic outcome and resistant even transgressive efficacy as also the absence or abandonment of any reason in or for performance **The Interiors Theory Primer** William Mangold, 2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves *The Interiors Theory Primer* maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship *The Interiors Theory Primer* offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply embedded in the human condition Accessible to students useful to professionals and provocative for scholars *The Interiors Theory Primer* argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional qualities but also for their powerful role in shaping contemporary life **Moving Objects** Damon Taylor, 2020-09-17 *Moving Objects* deals with emotive design designed objects that demand to be engaged with rather than simply used If postmodernism depended upon ironic distance and Critical Design is all about questions then emotive design runs hotter than this confronting how designers are using feelings in what they make Damon Taylor's original study considers these emotionally laden highly authored works often produced in limited editions and sold like art objects such as a chair made from cuddly toys a leather sofa that resembles a cow and a jewellery box fashioned from human hair Tracing the phenomenon back to the Dutch inflection that began with Droog designers like Jurgen Bey and Hella Jongerius Taylor conducts an analysis of the development of Design Art and looks for its origins in the uncanny explorations of surrealism Offering a critique of Speculative Design and an examination of the work of designers such as Mathias Bengtsson whose work involves growing furniture inside computers Taylor asks what happens when the tangible melts into the datascape and design becomes a question of mobilities In this way *Moving Objects* examines contemporary issues of how

we live with artefacts and what design can do      **Contemporary Museum Architecture and Design** Georgia Lindsay, 2020-01-29 Contemporary Museum Architecture and Design showcases 18 diverse essays written by people who design work in and study museums offering a variety of perspectives on this complex building type Throughout the authors emphasize new kinds of experiences that museum architecture helps create connecting ideas about design at various levels of analysis from thinking about how the building sits in the city to exploring the details of technology With sections focusing on museums as architectural icons community engagement through design the role of gallery spaces in the experience of museums disability experiences and sustainable design for museums the collected chapters cover topics both familiar and fresh to those interested in museum architecture Featuring over 150 color illustrations this book celebrates successful museum architecture while the critical analysis sheds light on important issues to consider in museum design Written by an international range of museum administrators architects and researchers this collection is an essential resource for understanding the social impacts of museum architecture and design for professionals students and museum lovers alike

**Where Stuff Comes From** Harvey Molotch, 2004-11-23 Molotch takes us on a fascinating exploration into the worlds of technology design corporate and popular culture We now see how corporations designers retailers advertisers and other middle men influence what a thing can be and how it is made We see the way goods link into ordinary life as well as vast systems of consumption economic and political operation The book is a meditation into the meaning of the stuff in our lives and what that stuff says about us      What Can a Body Do? Sara Hendren, 2020-08-18 Named a Best Book of the Year by NPR and LitHub Winner of the 2021 Science in Society Journalism Book Prize A fascinating and provocative new way of looking at the things we use and the spaces we inhabit and a call to imagine a better designed world for us all Furniture and tools kitchens and campuses and city streets nearly everything human beings make and use is assistive technology meant to bridge the gap between body and world Yet unless or until a misfit between our own body and the world is acute enough to be understood as disability we may never stop to consider or reconsider the hidden assumptions on which our everyday environment is built In a series of vivid stories drawn from the lived experience of disability and the ideas and innovations that have emerged from it from cyborg arms to customizable cardboard chairs to deaf architecture Sara Hendren invites us to rethink the things and settings we live with What might assistance based on the body's stunning capacity for adaptation rather than a rigid insistence on normalcy look like Can we foster interdependent not just independent living How do we creatively engineer public spaces that allow us all to navigate our common terrain By rendering familiar objects and environments newly strange and wondrous What Can a Body Do helps us imagine a future that will better meet the extraordinary range of our collective needs and desires      **WorkingSPACE** April Jodi Gruber, 2004      The Utne Reader ,1999-03      *CED News* ,2001      Interiors ,2000      *The Architects' Journal* ,2003      **Supplemental information** University of California, Berkeley. Department of Architecture, 2003      *Interior Design Handbook of Professional Practice*
