Challenge Of Europe:

Challenges for Europe in the World, 2030 John Eatwell, Terry McKinley, 2016-04-15 Challenges for Europe in the World 2030 embodies critical thinking about the long term implications for Europe of the clear shift of power from the West to the East and the South Designed as a multi faceted project this book presents an integrated assessment covering a wide range of policy areas and alternative assumptions about trends in global and European governance In order to reach this ambitious objective in a comprehensive and consistent way several types of quantitative and qualitative approaches have been combined a model of macro regions of the world economy an institutional perspective and lessons from foresight studies With a strong focus on policy implications the book is introduced by an executive summary which outlines the project assumptions especially on the future of Europe in the context of the current economic crisis and of the emergence of a new balance of powers in the global economy Subsequent chapters cover the regulation of finance trade and technology developments environmental sustainability employment conditions and population wellbeing The book concludes with an assessment of the extent to which these developments are likely to lead to significant political changes in Europe In sum this book challenges public policy makers to re assess their thinking in shaping Europe s future

The European Challenge in Europe and the Western Balkans Region Igor Luksic, 2016 Where do we actually live What challenges are we facing here in Europe Are we even aware of all these challenges Are we aware of the pendulum that is constantly swinging The world is changing it is becoming poly centric What Mediterranean once was the Atlantic was after it and now the role has been taken by the Pacific Such comprehension has a devastating effect on the Euro centric view of the world A Copernican twist meaning that the roads no longer begin in Europe but instead we might all be fighting together to keep track with the rest of the world Is this the essence of the European interest to be on the path of the New Silk Road All the challenges listed above are without doubt European challenges They are challenges to Europe and also to us in the Western Balkans who aim to become a political and factual part of the EU And to make things more complex all the challenges mentioned here are relatively short term in nature as Europe like other parts of the world looks for answers to issues such as climate change energy needs food in the 21st century and the needs related to the demographic trends If in the 1960s and 1970s the demographic image of the world had resembled a pyramid in which the oldest people were the fewest in the general population and the youngest were the most numerous than today in Europe and in Montenegro this pyramid looks more like a cylinder which entails serious social expenditure This means social security expenses i e economic challenges given that we are facing various questions such as How to maintain productivity How to encourage economic activity How to provide pensions social security etc In that context an important issue for us in the region is how to be a part of this story of finding a new kind of identity

Europe's 21st Century Challenge Didier Bigo, 2010 A study of illiberal practices of liberal regimes in the field of security The work explores the relationship between the internal and external effects of these practices in an

increasingly interconnected world order as well as the effects in relation to the place of the EU in world politics

Europe's High-End Military Challenges Seth G. Jones, Rachel Ellehuus, 2022-02-02 This CSIS report examines the evolution of European military capabilities over the next decade. It asks two main questions: What military capabilities might European allies and partners of the United States possess by 2030? And what types of military missions will these states be able and unable to effectively perform by 2030? First, European militaries including the largest and most capable European NATO members will continue to struggle to conduct several types of missions without significant U.S. assistance. Second, European militaries will face significant challenges in the Indo-Pacific. Third, Europe's major powers will likely have the capability to conduct most types of missions at the lower end of the conflict continuum without significant U.S. military aid. To sustain progress and overcome remaining challenges, NATO will have to revise its burden-sharing metrics, modernize defense planning and procurement practices, and address lagging political will.

The Aftermath of the Global Crisis in the European Union Beáta Farkas, 2014-03-17 This collective volume is undoubtedly a major contribution to understanding the causes and consequences of the crisis of the Euro zone with a special emphasis on the implications of new and not yet EMU members. A skilful combination of contrasting theoretical and policy perspectives, a refreshing interchange among academics and practitioners from a number of countries, it is a must reading for anyone seriously interested in the political economy of crisis and reform in Europe.

Lszl Csaba, Professor of International Political Economy, Central European University and Corvinus University of Budapest, Past President of the European Association for Comparative Economic Studies. This book offers a refreshing analysis of what is rapidly becoming Europe's lost decade. The authors, all established experts in their fields, see light at the end of the tunnel, but it seems quite distant.

Andr Sapir, Senior Fellow, Bruegel, Professor of Economics, Universit libre de Bruxelles. The papers included in the volume uphold the pressing question of whether Europe can resume its role as a growth and convergence engine. Issues of growth, macro stabilization, and employment in the economically diversified internal market come in this context to the fore of the discussion. The editor of the volume, Professor Beata Farkas, skilfully brings together research focusing on diverse facets of the European economies in order to address questions such as:

1. Does one size fit all?
2. How can we change the EU budget to make it more effective?
3. Can Europe learn some lessons from the two lost decades in Japan?
4. Is inflation targeting a proper approach in defining monetary policy?
5. How do we conduct an effective fiscal policy?

The added value of the volume consists in diversified methodological and conceptual perspectives employed to address the problems at hand. Ideas and arguments are presented in a novel and interdisciplinary manner. As such, the discussion that unfolds throughout the volume will be stimulating for researchers, decision makers in the government, and those in the corporate world. My recommendation is simple: take the book and read it.

How

Referendums Challenge European Democracy Richard Rose,2020-04-22 This book explains how citizens are using referendums to challenge decisions taken by the European Union The opening chapters compare the two chief institutions of electoral democracy parliamentary elections to decide who governs and referendums to decide policies The EU relies on international treaties for its authority to make policies Chapters analysing referendum voting on Europe in Britain Greece and the Netherlands show that cultural values can have a stronger influence than class The book uses Brexit the British referendum in which a majority voted for the UK leaving the European Union as the leading example of a conflict between national voters and the EU However taking back control of policymaking does not ensure effective policymaking when success depends not only on what the British Parliament does but also on decisions taken in Brussels Washington and elsewhere Boris Johnson s electoral success is insufficient to deliver all his promises in the world beyond Brexit The EU is challenged too as its policies increasingly depend on what happens on other continents
