## **Challenge Of The Land:**

**Challenge of the Land, By Charles E. Little** Charles E. Little,1969 *Land administration service delivery and its challenges in Nigeria* Ghebru, Hosaena,Okumo, Austen,2017-01-05 This paper assesses the nature of land administration service delivery in Nigeria using data collected from three sets of participants in land administration processes 76 service providers 253 beneficiaries and 172 professionals The data were collected from eight states selected from the six geopolitical zones of the country Cross River Benue Bauchi Ekiti Enugu Kaduna and Lagos states plus the Federal Capital Territory Abuja These were chosen because they are considered to have advanced land administration systems Our findings show that land registration processes in Nigeria take a long time nearly 80 percent of beneficiaries and 41 percent of professionals responded that land registration took more than two years to complete after first apply ing This difference between beneficiaries and professionals may stem from the fact that many professionals who gener ally are better educated may know more about the application process than do beneficiaries and are able to navigate the process more efficiently Land registration information guidelines seem to be rarely available to the public Consequently the dominant means of access to land administration institutions is through direct contact Coordination among govern ance structures put in place by states for land administration also was found to be poor especially in Bauchi and Enugu states where very low levels of cooperation on issues related to land administration reforms were observed

**Land Use Law in Florida** W. Thomas Hawkins,2021-06-28 *Land Use Law in Florida* presents an in depth analysis of land use law common to many states across the United States using Florida cases and statutes as examples Florida case law is an important course of study for planners as the state has its own legal framework that governs how people may use land with regulation that has evolved to include state directed urban and regional planning The book addresses issues in a case format including planning land development regulation property rights real estate development and land use transportation and environmental regulation Each chapter summarizes the rules that a reader should draw from the cases making it useful as a reference for practicing professionals and as a teaching tool for planning students who do not have experience in reading law This text is invaluable for attorneys professional planners environmental property rights and neighborhood activists and local government employees who need to understand the rules that govern how property owners may use land in Florida and around the country *Draft*
