Rudy C. Douven

Challenging Neighbours Rethinking German And Dutch Economic Institutions:

Challenging Neighbours CPB Netherlands Bureau for Economic Policy Analysis,2012-12-06 Challenging Neighbours provides wide coverage of the German and Dutch economies from an institutional point of view Pensions competition policy labour relations corporate governance and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared The difficulties and successes the countries have in facing pressures from aging population developments in technology and global competition are traced back to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers Challenging Neighbours Netherlands. Centraal Planbureau,1997-08-20 Challenging Neighbours provides wide coverage of the German and Dutch economies from an institutional point of view Pensions competition policy labour relations corporate governance and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared The difficulties and successes the countries have in facing pressures from aging population developments in technology and global competition are traced back to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers

Culture and Consensus in European Varieties of Capitalism I. Bruff,2008-09-11 Using two milestones in the Dutch and German political economies Wassenaar and Alliance for Jobs respectively this book argues that Antonio Gramsci s common sense provides us with the conceptual apparatus necessary for analysing the integral role played by culture and consensus in the trajectories of national capitalisms in Europe *The Nebi Yearbook 1998* P. Joenniemi,Lars Hedegaard,A. Östhol,Bjarne Lindström,K. Peschel,C.-E. Stalvant,2012-12-06 Thorvald Stoltenberg Ambassador Chairman of the Editorial Advisory Board Most of us have been overwhelmed by the speed and extent of the changes that have been taking place in Europe since the late 1980s Over the span of a few years we have witnessed the collapse of the Soviet Union and the unification of Ger many This process has had far reaching implications for Northern Europe the Baltic states have attained independence and with the establishment of the Baltic Sea regional co operation and the Barents co operation a new type of East West relations has come into being The process of change continues Its latest manifestation is the agreement between Russia and NATO and NATO and EU enlargement is expected to take place over the next few years With such far reaching transformations we need to reflect on what is hap pening We need a more coherent picture of the new situation in Northern Europe and of where we are heading This Yearbook is an attempt to fulfil this need I would like to thank the editors for taking this initiative which has been long awaited by those of us who have been actively interested in the improved relations between the former East and the old West that have been made possible by the end of the Cold War and particularly in the new opportunities for cross border co operation and integra tion in the North European and Baltic space

CPB Report ,1999 **One Political Economy, One Competitive Strategy?** Andrea M. Herrmann,2008-12-18 This book examines how firms adapt to the pressures of increasing international competition by testing the arguments on strategy

specialization proposed in the competitiveness literature in general and by contributors to the varieties of capitalism debate in particular. If different economies are characterized by distinct institutional arrangements, successful firms would be those that exploit the related comparative advantages and specialize in the competitive strategies facilitated by national institutions. One Political Economy One Competitive Strategy begins with an assessment of how many pharmaceutical firms in Germany, Italy, and the UK pursue strategies facilitated by national institutions governing the financial markets, antitrust activities, and the labour market. Quantitative analyses reveal that deviant firms competing through institutionally unsupported strategies outnumber conforming firms by far. Not only does this finding run counter to the expectations of the competitiveness literature, it brings up a whole new line of inquiry: How can firms compete through strategies that are not supported by national institutions? The book addresses this question and illustrates that firms do not necessarily exploit comparative institutional advantages but that they can also circumvent institutional constraints. International markets and individual collaboration on a contractual basis allow firms to compete despite comparative institutional disadvantages. These findings suggest that trade liberalization does not lead to strategy specialization but to strategy diversification, depending on the inventiveness of entrepreneurs to develop individual approaches to compete.

The Politics of Scientific Advice

Justus Lentsch, Peter Weingart, 2011-06-02. Controversies over issues such as genetically engineered food, foot and mouth disease, and the failure of risk models in the global financial crisis have raised concerns about the quality of expert scientific advice. The legitimacy of experts and of the political decision makers and policy makers whom they advise essentially depends on the quality of the advice. But what does quality mean in this context and how can it be achieved? This volume argues that the quality of scientific advice can be ensured by an appropriate institutional design of advisory organisations. Using examples from a wide range of international case studies, including think tanks, governmental research institutes, agencies, and academies, the authors provide a systematic guide to the major problems and pitfalls encountered in scientific advice and the means by which organisations around the world have solved these problems.

Macroeconomic Causes of Unemployment: Diagnosis and Policy Recommendations / Wolfgang Filc, Claus Köhler, 2015-03-03. This conference volume deals with one of the most severe economic, social, and political problems major European economies face since the early nineties: the problem of lasting high unemployment. Contrary to the current German discussion, solely concentrating on microeconomic explanations and therapy recommendations, this volume presents papers based on various macroeconomic points of view, showing different ways out of the employment crisis. Apart from renowned German economists, some well-known international academics participated in the 1998 Berlin symposium to learn from experience in other countries. The first chapter contains the main standard textbook models and paradigms explaining lasting high unemployment. The question in the second chapter is if it is possible to fight unemployment with the help of macro policy on a purely national basis in the presence of global markets. The third chapter indicates possible effects of misalignments in financial markets on economic

growth and employment The contributions of the fourth chapter present experiences of other countries which have succeeded in recent years in lowering their unemployment rates The question at issue is if these concepts can be transferred to Germany The topics of the concluding chapter are practical macroeconomic starting points for sustainable employment growth in Europe The methods contradict supply side arguments for the stabilisation of employment predominant in the German discussion Attention is focused on relations between the role of monetary and fiscal policy in close conjunction with wage policy Furthermore it is made evident that in global markets a theoretical macroeconomic concept as a base for sustainable employment is not very promising without enhanced international co operation

Forestry and the New Institutional Economics Sen Wang,G. Cornelis van Kooten,2018-02-06 This title was first published in 2001 Using a case study from British Columbia this book addresses the economies of institutions institutional change and transactions costs and develops the theory of the New Institutional Economics in the context of forestry institutions This approach to economic analysis of forestry investment problems will emphasize the understanding of the linkages between the biological as well as institutional attributes of forestry activities

Restoring Public Debt Sustainability George Kopits,2013-10-17 Restoring Public Debt Sustainability The Role of Independent Fiscal Institutions represents the first comprehensive survey of a new generation of independent fiscal institutions established to promote transparency in public finances through real time monitoring of the soundness of budgetary policymaking The chapters authored by heads of the institutions as well as distinguished policy analysts and academics explore the rationale and experience of these fiscal watchdogs Consequently useful lessons and implications are drawn for the design and practical operation of such institutions The timeliness of the volume is underscored by the potential role of fiscal watchdogs in containing the public debt crisis that has engulfed a number of countries Indeed the recent proliferation of these institutions has been in response to the need for enhancing policy credibility of highly indebted governments in financial markets and more generally for strengthening the quality of economic governance The first part of the book deals with key analytical and institutional issues the political environment the scope and limits of these institutions the delegation of monetary policymaking to an independent body and the implications of rising public indebtedness The second part contains case studies of institutions that for the most part were born as a result of domestic political developments The third part presents the experience of institutions whose origins can be traced directly or indirectly to an earlier or a recent financial crisis The chapters are written from a multidisciplinary economic financial political legal perspective intended for academics researchers and practitioners alike
