Chance For The Future:

Predicting the Future Nicholas Rescher, 1998-01-01 The future obviously matters to us It is after all where we ll be spending the rest of our lives We need some degree of foresight if we are to make effective plans for managing our affairs Much that we would like to know in advance cannot be predicted But a vast amount of successful prediction is nonetheless possible especially in the context of applied sciences such as medicine meteorology and engineering This book examines our prospects for finding out about the future in advance It addresses questions such as why prediction is possible in some areas and not others what sorts of methods and resources make successful prediction possible and what obstacles limit the predictive venture Nicholas Rescher develops a general theory of prediction that encompasses its fundamental principles methodology and practice and gives an overview of its promises and problems Predicting the Future considers the anthropological and historical background of the predictive enterprise It also examines the conceptual epistemic and ontological principles that set the stage for predictive efforts In short Rescher explores the basic features of the predictive situation and considers their broader implications in science in philosophy and in the management of our daily affairs

Kristie Miller,2024-12-10 This book empirically investigates the nature of time biases Many philosophers think that it is rationally permissible to prefer a life that is overall worse to one that is overall better as long as the badness of that life lies in the past rather than the future These philosophers think that it is rationally permissible to be time biased Time biased individuals differently value the wellbeing of their various selves in virtue of where those selves are located in time This book focuses on three key kinds of time bias near present and future bias It presents a rich picture of the conditions under which we display these biases and it outlines several psychological explanations for them It then uses this new empirical research we conducted to inform arguments regarding the normative status of these biases At its heart it considers the question does having time biased preferences of one sort or another make us better off or worse off And it uses the answers to these questions to inform our theorising about whether we have reason either to have or to avoid having such preferences The Past, Present and Future of the Negro Ali Soliman,1926 The Fitch Bond Book Describing the Most Important Bond Issues of the United States and Canada ,1925 **The Gospel Message** ,1913 *The Modern Legal Philosophy Series...* ,1914
