Change Intervention And Consequence:

Locus of Control: Antecedents, Consequences and Interventions Using Rotter's Definition Yasmin Iles-Caven, Steve Nowicki, Ari Kalechstein, 2021-09-07 **A Behavior Analytical Perspective on the Relationship of Context Structure and Energy Using Flexibility in Problems of Supply and Demand Mismatch** Farina Wille, 2021-09-22 Enabling an integration of large amounts of variable renewable energy VRE into an energy system is an important contribution to reduce part of its associated carbon dioxide emissions A resulting challenge from integrating VRE is an increase in mismatch between supply and demand which could be reduced by increasing demand side flexibility in the residential sector by shifting energy using behavior This thesis offers a theoretical and empirical analysis of energy using flexibility based on behavior analysis principles to relate what it can mean to account for a human dimension in an electrical energy system To characterize degrees of freedom in allocating behavior and options for flexibility of energy using behavior variability of behavioral patterns in terms of homogeneity between individuals is analyzed Notably even in times for which one could principally expect more variability between behavioral patterns such as in the afternoon and evening one finds that behavioral activities are pre structured clearly limiting the possibilities for shifting energy using behavior The behavior analytical perspective highlights the importance of addressing context structure and associated behavioral effort for shifting behavior when addressing the challenge of mitigating the mismatch problem for a more sustainable energy system

Lessons from Growth and Structural Change in the Second-tier South East Asian Newly Industrializing Countries Jomo Kwame Sundaram,1996

Individual Development and Social Change John R. Nesselrode,Alexander von Eye,1985 Individual Development and Social Change Explanatory Analysis represents a convergence of three lines of emphasis now visible in developmental research and theory building The three are 1 the life course as a focus for the study of development and social change and their interrelationships 2 the life span orientation to the study of individual development with its acknowledgment of the salience of contextual features for understanding development and 3 the growth of methodological innovations that provide more appropriate and powerful ways of exploiting data gathered to describe an

Changing Urban Education Clarence Nathan Stone,1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation s leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect

education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future Counseling in the Community College
