## Changing Law:

**Law and Social Solidarity in Contemporary China** Han Peng, 2020-12-29 This book adopts Durkheim's legal perspective to treat law as a symbol of social solidarities to examine Chinese society. The work analyzes changes in the nature of social solidarity from observing changes in laws, thus drawing together western socio-legal theory and distinctive Chinese conditions. It draws on Durkheim's theoretical framework and methodology to develop a more comprehensive understanding of the role of law using theories of others such as Habermas and by taking into account the discussion of power and the conflicts of interests in analyzing key social features during transition. The analysis of social anomie in terms of the changes of juridical rules as well as the changes in the nature of social solidarity provides an inspiring perspective to look into contemporary social problems. The book will be essential reading for researchers and academics working in the areas of socio-legal studies, legal theory, and law and society in China.

**A Treatise on the Law of Insurance of Every Kind** Joseph Asbury Joyce, 1918

**The Oxford Handbook of International Climate Change Law** Cinnamon Piñon Carlarne, Kevin R. Gray, Richard Tarasofsky, 2016 As the threats posed by changing weather patterns are becoming more apparent, climate change law has emerged as an important area of law in its own right. This Handbook provides a comprehensive understanding of this growing subject, setting out the key institutions and processes and featuring interdisciplinary insights from leading experts.

*The Routledge Handbook of Applied Climate Change Ethics* Donald A. Brown, Kathryn Gwiazdon, Laura Westra, 2023-09-27 The Routledge Handbook of Applied Climate Change Ethics is a powerful reference source for the identification and exploration of the underlying ethical issues in climate change law and policy. Bridging theory with practice, it takes ethical engagement out of the classroom and into the halls of governance. The Handbook's 39 chapters, written by a diverse and interdisciplinary team of experts from around the world, are case studies divided into five parts. Parts I-IV highlight the ethical issues that arise in climate change policy formation: from duties not to harm to duties to consider the views and voices of those who will be or are being harmed; from the role of human rights, justice, and democracy to how to identify and respond to disinformation and denialism. It also raises the ethics of various policy responses such as cap and trade, carbon taxing, and geo-engineering. Part V offers a way forward with strategies on how to expressly consider ethics in climate change policy formation, from negotiations to education, media communication, and the power and potential of shaming. The volume is essential reading for students, professors, and practitioners who wish to better engage with government and non-government organizations on climate policy, to better understand the practical application of the theory and philosophy of ethics, and how to more strongly draft and defend ethical action in negotiating
