Changing Nature Of Persecution:

The Changing Nature of Religious Rights under International Law Malcolm Evans, Peter Petkoff, Julian Rivers, 2015-03-19 The Declaration on the Elimination of All Forms of Intolerance and of Discrimination Based on Religion or Belief as proclaimed by the United Nations General Assembly in 1981 is the only universal human rights instrument specifically focusing on religious intolerance and discrimination. However, recent years have seen increasing controversy surrounding this right in both political and legal contexts. The European Court of Human Rights has experienced a vast expansion in the number of cases it has had brought before it concerning religious freedom and politically the boundaries of the right have been much disputed. This book provides a systematic analysis of the different approaches to religious rights which exist in public international law. The book explores how particular institutional perspectives emerge in the context of these differing approaches. It examines and challenges these institutional perspectives. It identifies new directions for approaching religious rights through international law by examining existing legal tools and assesses their achievements and shortcomings. It studies religious organisations support for international human rights protection as well as religious critique of international human rights and the development of an alternative religious Bills of Rights. It investigates whether expressions of members belonging to religious minorities can be considered under the minority right to culture rather than the right to religion and discusses the benefits and shortcomings of such a route. It analyses the reach and limits of the provisions in the 1981 Declaration, identifies ways in which the right is being eroded as a concept and suggests new ways in which the right can be reinforced and protected. *The Changing Nature of Persecution*, 2001 *The 1951 Convention Relating to the Status of Refugees and Its 1967 Protocol* Andreas Zimmermann, Terje Einarsen, Franziska M. Herrmann, 2024 The 1951 Refugee Convention and its 1967 Protocol are the cornerstones of international refugee law. This Commentary provides a systematic article by article analysis of their provisions in addition to crosscutting thematic chapters. The Commentary is an indispensable tool for lawyers, decision makers and academics. **Cross-Border Cooperation in the Age of Climate Change** Castanho, Rui Alexandre, 2025-10-23 In the face of climate change, cross-border cooperation emerges as a pillar for effective global action. Environmental challenges like rising temperatures, weather events, and biodiversity loss do not recognize national boundaries, making international collaboration essential for progress. From joint climate agreements and technology sharing to coordinated disaster response and sustainable trade practices, countries realize that unified efforts yield greater impact than isolated initiatives. As climate risks intensify, fostering trust, aligning policies, and sharing resources across borders will be crucial to building climate resilience and driving equitable transition to a low-carbon future. *Cross-Border Cooperation in the Age of Climate Change* explores how border regions, often overlooked in national climate strategies, can become key arenas for sustainable development, climate adaptation, and strategic planning. It examines how transboundary cooperation fosters innovation in governance, environmental resilience, and territorial

integration This book covers topics such as data management globalization and environmental monitoring and is a useful resource for policymakers government officials business owners climatologists academicians researchers and environmental scientists

Women, Borders, and Violence Sharon Pickering, 2010-12-21 Women at the Border analyzes border policing practices currently informed by paradigms of securitization against unauthorized mobility and explores the potential for a paradigm shift to a more ethical regulation of borders By focusing on the ways women have sought to cross borders in extra legal fashion the book shows how border enforcement differentially impacts on some populations and makes the case that unauthorized migration requires management rather than repulsion and criminalization When facing the emerging and future challenges of unauthorized mobility border policing must be recast as a function of human rights that results in greater human security at the border Examining gender and border policing across Europe North America and Australia this book enhances our understanding of the gendered determinants of extra legal border crossing border policing and the changing dynamics of unauthorized mobility
