Changing Face Of Call A Japanese Perspective:

Linguistic Informatics □ State of the Art and the Future Yuji Kawaguchi, Susumu Zaima, Toshihiro Takagaki, Kohji Shibano, Mayumi Usami, 2005-04-14 It is widely believed that linguistic theories and information technology have considerably influenced foreign language education. However, the collaboration of these three domains has not brought about new scientific results. It is thus our attempt to realize an integration of theoretical and applied linguistics on the basis of computer sciences and establish a new synthetic field called Linguistic Informatics. The present volume constitutes the Proceedings of the First International Conference on Linguistic Informatics held at Tokyo University of Foreign Studies (TUFS) in December 2003. The volume is comprised of five chapters: 1 Computer Assisted Linguistics: Potential for collaboration between linguistics and informatics; 2 Corpus Linguistics: Status report on corpus based linguistic research; 3 Applied Linguistics: Relationship between second language acquisition and linguistic theory; 4 Discourse Analysis and Language Teaching: Current status of natural dialogue based discourse analysis; 5 TUFS Language Modules: Development of multilingual e-learning materials covering 17 different languages. Mobile Learning John Traxler, Agnes Kukulska-Hulme, 2007-04-11 Emphasising the issues of usability, accessibility, evaluation and effectiveness and illustrated by case studies drawn from contemporary projects from around the world, this book considers the fundamentals of mobile technologies and devices, the educational foundations of modern networked learning, the issues that underpin mobile learning and make it accessible for all users, the challenges of making mobile learning a substantial and sustainable component in colleges, universities and corporations, implications and issues for the future. Mobile Learning provides useful, authoritative and comprehensive guidance for professionals in higher and further education and trainers in the business sector who want to find out about the opportunities offered by new technologies to deliver support and enhance teaching, learning and training. *The Changing Face of CALL* P.N.D. Lewis, 2002-01-01 This volume presents 17 perspectives on CALL and language technology from teachers and researchers connected to the CALL Special Interest Group of the Japan Association for Language Teaching. The book aims to shed light on progress in both theoretical and practical areas of CALL.
