Changing Maps Governing In A World Of Rapid Change:

Changing Maps Steven A. Rosell, 1995 How can we organize and govern ourselves successfully in a world of rapid change and increasing interconnection This book reports the findings of a round table of senior Canadian government officials and private sector executives exploring fundamental changes in the economy in culture and values and in the social contract that characterize the emergence of a global information society [Political Science Abstracts](#) ,2013-03-07 The 1996 Supplement of Political Science Abstracts contains 10 000 carefully prepared abstracts of materials from public affairs magazines major newspapers professional journals and books devoted to politics and political analysis The organization of the proceeding volumes has been retained intact as has the recently added list of subdisciplinary descriptors Users of earlier volumes will be on familiar ground while those new to Political Science Abstracts will find the instructions on page ix easy to master

Street Protests and Fantasy Parks David Cameron, Janice Gross Stein, Janice Stein, 2002 The speed and intensity of global integration in the last two decades have provoked serious debate about the human impact of globalization and deep concern about the capacity of the state to provide social justice *Street Protests and Fantasy Parks* focuses on two dimensions of globalization the cultural and social realities of global connection and the uneasily shifting role of the state While global processes are fusing societies and economies more deeply than ever before the editors argue that obituaries for the state are premature if not wholly inappropriate These essays examine a series of compelling case studies the entertainment industry citizenship social activism and wired communication to assess the choices states have and the consequences of those choices for culture and society [The Synchronization of National Policies](#) Pertti Alasuutari, 2015-09-25 *The Synchronization of National Policies* shows how it is possible that there is remarkable uniformity in the policies that the nation states adopt although there is no world government Mainstream research attributes such global governance to the influence of leading countries to functional requirements created by capitalism and technological development or to international organizations This book argues that to understand how national policies are synchronized we need to realize that the global population forms a single global tribe of moderns divided into some 200 clans called nations

While previous research on the world culture of moderns has focused on the diffusion of ideas this book concentrates on the active role of local actors who introduce global models and domesticate them to nation states In national policymaking actors justify new policies by international comparisons by the successes and failures of models adopted in other countries and by building and appealing to the authority of international organizations Consequently national policies are synchronized with each other Yet because of the way such domestication of global trends takes place citizens retain and reproduce the understanding that they follow a sovereign national trajectory This book will be of interest to students and scholars of sociology world culture theory globalization international relations and political science

Reworking Success Robert Theobald,1997 Challenging the current dogma of maximum economic growth globalization and international competitiveness well known futurist Robert Theobald argues persuasively that to survive we must overhaul our whole concept of success The required criteria of success for the next phase of human social evolution are ecological integrity and a respect for all of nature effective participatory decision making and social cohesion based on profoundly changed concepts of justice These radically changed goals force us to radically reconstruct our communities Reworking Success documents the steady slide of successes into failures that characterize the latter part of this century and then describes the new role that citizens are adopting in helping to create new kinds of success today and in the future

The Information Society Robin Mansell,2009 The information society refers to a constellation of developments arising from the growing use of communication technologies in the acquisition storage and processing of information and the role of information in supporting the creation and exchange of knowledge Research on information societies really began to take off in the 1970s when Daniel Bell wrote about the information age While there were earlier works that focused on the growing importance of information in the economy it was not until the mid 1990s and the spread of the Internet that this field of study experienced a huge expansion across a broad range of disciplines in the social sciences and beyond A critical mass of scholarship has now accumulated establishing the information society and information societies as a terrain of substance and complexity the exploration and understanding of which requires increasingly sophisticated navigation skills As research in and around the area continues to flourish as never before this new title in Routledge s Major Works series Critical Concepts in Sociology meets the need for an authoritative reference work to make sense of a rapidly growing and ever more complex corpus of literature and to provide a map of the area as it has emerged and developed over the last thirty years or so The Information Society is fully indexed and has a comprehensive introduction newly written by the editor which places the material in its historical and intellectual context It is an essential work of reference and is destined to be valued by scholars and students as well as policy makers and practitioners in the field as a vital one stop research resource Publisher s website
