Indonesia has been an electoral democracy for more than a decade and yet the political landscape of the world s third largest democracy is as complex and enigmatic as ever The country has achieved a successful transition to democracy and yet Indonesian democracy continues to be flawed illiberal and predatory This book suggests that this and other paradoxes of democracy in Indonesia often assume occult forms in the Indonesian political imagination and that the spirit like character of democracy and corruption traverses into the national media and the political elite Through a series of biographical accounts of political entrepreneurs all of whom employ spirits in various but always highly contested ways the book seeks to provide a portrait of Indonesia s contradictory democracy contending that the contradictions that haunt democracy in Indonesia also infect democracy globally Exploring the intimate ways in which the world of politics and the world of spirits are entangled it argues that Indonesia s seemingly peculiar problems with democracy and spirits in fact reflect a set of contradictions within democracy itself Engaging with recent attempts to look at contemporary politics through the lens of the occult *Democracy Corruption and the Politics of Spirits in Contemporary Indonesia* will be of interest to academics in the fields of Asian Studies Anthropology and Political Science and relevant for the study of Indonesian politics and for debates about democracy in Asia

and beyond

The Orang Suku Laut of Riau, Indonesia Cynthia Chou, 2009-10-16 Land reform has been an indisputable part of Indonesian revolution. The consequent execution of development programmes for nation building have provoked intense hostility over territorial rights. Global market forces in Indonesia have seen increasing flows of transnational investments, technology and resources that have resulted in great demand on sea and land spaces. In this momentum of change, several aspects of rural culture, including indigenous populations like the Orang Suku Laut people of the sea of Riau, have been deemed by the state architects of development programmes to hinder progress. For generations, the sea and coastal places have been the life and living spaces of the Orang Suku Laut, and they claim ownership to these territories based upon customary laws. The developmental pressure thus generated has led to intense struggles over territorial rights. It has also raised issues concerning the social assimilation of indigenous peoples as citizens, religious conversion and cultural identity. Cynthia Chou discusses how Indonesian nation building development programmes have generated intense struggles over issues pertaining to territorial rights, social assimilation of indigenous peoples as citizens, religious conversion and cultural identity. This book is a stimulating read for those interested in Social and Cultural Anthropology, Development Studies and Southeast Asian Studies.

Identity and the State in Malaysia Fausto Barlocco, 2013-12-04 Using the case study of the Kadazan of Sabah, a region in the Malaysian section of Borneo, this book examines national, ethnic and local identities in post-colonial states. It shows the importance of the connection between lived experience and identity and belonging, and by doing so provides a deeper and fuller explanation of the apparently contradictory conflict between different collective forms of identification and the way in which they are employed in reference to everyday situations. Based on ethnographic fieldwork and historical analysis, the book reconstructs the development of the cultural forms and labels associated with the collective identities it studies. The author employs an approach that sees collective identification as an expression of everyday practices and that stresses the importance of participation and familiarity between forms of identification and lived experience. In this context, he considers anthropological debates about state minorities, relations and issues of dignity and respect. Explaining state minority relations in Malaysia and more generally in other post-colonial realities, the insights presented are highly relevant to other cases of conflicting allegiances and identity politics in settings of post-colonial nation building.
