## **Discipline Or Disaster:**

**Discipline Or Disaster?** Emery Stoops, Joyce King-Stoops, 1972      **Discipline Or Disaster** Paul M. Magoon, John B. Richards, 1966-01-01      Discipline Or Disaster? by Emery Stoops and Joyce King-Stoops Emery Stoops, 1972      **Discipline Or Disaster, Management's Only Choice**, 1966      *Economic and Natural Disasters since 1900* John Singleton, 2016-03-25

A crisis is a period of uncertainty that may or may not lead to disaster depending in part on the capacity of actors to make sense of what is happening and respond effectively. Disasters in different spheres occur and recur at different speeds and in idiosyncratic ways but in essence they follow the same pattern. In the wake of the Global Financial Crisis and Eurozone upheavals this timely book argues that the disaster cycle a framework normally used in the context of natural disasters is equally applicable to the analysis of other types of catastrophe. Employing a modified version of the disaster cycle framework to compare and analyse a range of catastrophes in different spheres the author draws on ideas from a variety of disciplines including economics and economic history disaster studies management and political science. This unique comparative approach presents case studies of several important disasters Hurricane Katrina the First World War the depression of the early 1930s Welsh coal mining accidents the deadly effects of smoking tobacco and the Global Financial Crisis and Eurozone catastrophe of the early twenty first century. The author argues that economists and economic policy makers routinely misuse the term crisis to describe episodes that ought to be called disasters. This accessible and fascinating exploration will appeal to students and scholars in economic history disaster studies management public policy and related disciplines. The comparison of crisis and disaster management is also essential reading for policy makers.      Disaster Research Rasmus Dahlberg, Olivier Rubin, Morten Thanning Vendelø, 2015-09-07. Given the tendency of books on disasters to predominantly focus on strong geophysical or descriptive perspectives and in depth accounts of particular catastrophes Disaster Research provides a much needed multidisciplinary perspective of the area. This book is structured thematically around key approaches to disaster research from a range of different but often complementary academic disciplines. Each chapter presents distinct approaches to disaster research that is anchored in a particular discipline ranging from the law of disasters and disaster historiography to disaster politics and anthropology of disaster. The methodological and theoretical contributions underlining a specific approach to disasters are discussed and illustrative empirical cases are examined that support and further inform the proposed approach to disaster research. The book thus provides unique insights into fourteen state of the art disciplinary approaches to the understanding of disasters. The theoretical discussions as well as the diverse range of disaster cases should be of interest to both postgraduate and undergraduate students as well as academics researchers and policymakers.

*Disaster Law* Kristian Cedervall Lauta, 2014-09-15. Disasters and their management are today central to public and political agendas. Rather than being understood as exclusively acts of God and Nature natural disasters are increasingly analysed as social vulnerability exposed by natural hazards. A disaster following an earthquake is no longer seen as caused

exclusively by tremors but by poor building standards ineffective response systems or miscommunications This book argues that the shift in how a disaster is spoken of and managed affects fundamental notions of duty responsibility and justice The book considers the role of law in disasters and in particular the regulation of disaster response and the allocation of responsibility in the aftermath of disasters It argues that traditionally law has approached emergencies including natural disasters from a dichotomy of normalcy and emergency In the state of emergency norms were replaced by exceptions democracy by dictatorship and rights by necessity However as the disaster becomes socialized the idea of a clear distinction between normalcy and emergency crumbles Looking at international and domestic legislation from a range of jurisdictions the book shows how natural disasters are increasingly normalized and increasingly objects of legal regulation and interpretation The book will be of great use and interest to scholars and researchers of legal theory and natural hazards and disasters

**Disasters in World History** Benjamin Reilly, 2024-08-27 Disasters in World History surveys the development of disaster studies as a discipline as well as presenting historical case studies and theories used by historians to understand disasters Disasters here defined as the complex interaction between natural hazards and specific human vulnerabilities have frequently left a mark on human history Cataclysms have toppled dynasties fueled massacres and shaped the culture of societies frequently affected by natural hazards This volume fosters understanding of such events by considering both social science theory and the natural science concepts relevant to disaster studies In addition the text makes heavy use of an emerging psychological theory relevant to disaster studies the behavioral immune system which helps to explain why xenophobic behavior and even violence often erupt in the aftermath of disasters Chapters consider specific examples of disasters earthquakes tsunamis volcanic eruptions climate change including modern anthropogenic climate change or global warming and tropical cyclones This book is an accessible resource ideal for undergraduates and instructors in world history environmental history and disaster studies courses

**The Methodist Quarterly Review** ,1929 [Chemical Engineering and Mining Review](#) ,1923 *The Publishers' Trade List Annual* ,1969 **Naval Digest, Containing Digests of Selected Decisions of the Secretary of the Navy and Opinions of the Judge Advocate General of the Navy** Judge Advocate General (Navy).,1916 **Enabling Rapid and Sustainable Public Health Research During Disasters** Institute of Medicine, Board on Health Sciences Policy, Forum on Medical and Public Health Preparedness for Catastrophic Events, 2015-04-06 Over the past decade preparedness and response capacities of government agencies hospitals and clinics public health agencies and academic researchers in the United States and abroad have been challenged by a succession of public health emergencies ranging from radiological threats to pandemics to earthquakes Through After Action Reports each of these emergencies has yielded important information and lessons learned that can inform future disaster response and recovery efforts However important information that needs to be collected during and immediately following these emergencies is often missed because of barriers and obstacles to gathering such data such as varying institutional review

board restrictions in different states no sustainable funding network for this type of work uncertainty on who should be involved in research response and a lack of knowledge around how best to integrate research into response and recovery frameworks Taking action to enable medical and public health research during disasters was the focus of a workshop held on June 12 and 13 2014 coordinated and supported jointly by the Institute of Medicine Forum on Medical and Public Health Preparedness for Catastrophic Events National Institute of Environmental Health Sciences the National Library of Medicine the U S Department of Health and Human Services Office of the Assistant Secretary for Preparedness and Response and the Centers for Disease Control and Prevention Invited speakers and participants from federal state and local government academia and community and worker organizations came together to discuss how to integrate research into existing response structures identify critical research needs and priorities identify obstacles and barriers to research discuss structures and strategies needed for deployment of a research study share ideas innovations and technologies to support research and explore data collection tools and data sharing mechanisms for both rapid and longitudinal research Enabling Rapid and Sustainable Public Health Research During Disasters summarizes the presentations and discussion of the workshop *Forty Thousand Sublime and Beautiful Thoughts Gathered from the Roses, Clover Blossoms, Geraniums, Violets, Morning-glories, and Pansies of Literature* ,1915 *Forty Thousand Quotations, Prose and Poetical* Charles Noel Douglas,1917 **Naval Digest** United States.
