Discourse Semantics:

Semantics Pilar Alonso, 2005 *Text and Context* Teun A. van Dijk, 1977 *Semantics and Pragmatics* Katarzyna Jaszczolt, 2002 This is a comprehensive and wide ranging introduction to various approaches to meaning The book contains a critical discussion of these approaches and gives accessible explanations of relevant terminology *Relevance and Linguistic Meaning* Diane Blakemore, 2002-09-26 The importance of discourse markers words like so however and well lies in the theoretical questions they raise about the nature of discourse and the relationship between linguistic meaning and context They are regarded as being central to semantics because they raise problems for standard theories of meaning and to pragmatics because they seem to play a role in the way discourse is understood In this new and important study Diane Blakemore argues that attempts to analyse these expressions within standard semantic frameworks raise even more problems while their analysis as expressions that link segments of discourse has led to an unproductive and confusing exercise in classification She concludes that the exercise in classification that has dominated discourse marker research should be replaced by the investigation of the way in which linguistic expressions contribute to the inferential processes involved in utterance understanding *Questions in Discourse* , 2019-04-09 The volume *Questions in Discourse Vol 1 Semantics* contains a comprehensive overview of the semantic analysis of questions and their role in structuring discourse next to a series of in depth contributions on individual aspects of question meanings The expert contributions offer novel accounts of semantic phenomena such as negation and biased questions question embedding exhaustivity disjunction in alternative questions and superlative quantification particles in questions Some accounts are modelled in the framework of inquisitive semantics whereas others employ alternative semantics and yet others point to the discourse structuring potential of marked questions All contributions are easily accessible against the background of the general introduction Together they give an excellent overview of current trends in question semantics *Discourses of Hope and Reconciliation* Michele Zappavigna, Shoshana Dreyfus, 2020-09-03 Bringing together leading and emerging scholars in Systemic Functional Linguistics this book explores the contributions made to SFL theory by James Robert Martin A leading light in the field for 40 years this book reviews explores and develops the theoretical agendas set out in his momentous body of work Focussed around the four themes of systemic functional theory linguistic typology educational linguistics and positive discourse analysis chapters debate and develop the key concepts of Martin s work Engaging with cutting edge theoretical debates in areas such as discourse semantics register and genre and affiliation *Discourses of Hope and Reconciliation* examines Martin s lasting impact on the field developing his momentous contributions to point the way to exciting future research directions in SFL **Discourse Semantics** Pieter A. M. Seuren, 1985-01-01 *Questions in Discourse* , 2019-04-09 The volume *Questions in Discourse Vol 2 Pragmatics* collects original research on the role of questions in understanding text structure and discourse pragmatics The in depth studies discuss the effects of focus questions and givenness in unalternative

semantics as well as the role of scalar particles question answer pairs and prosody from the perspective of Questions under Discussion Two contributions compare the discourse structuring potential of Questions under Discussion and rhetorical relations whereas another adds a perspective from inquisitive semantics Some contributions also look at understudied languages Together the contributions allow for a better understanding of question related pragmatic and discourse semantic phenomena and they offer new perspectives on the structure of texts and discourses

Semantic and Pragmatic Issues in Discourse and Dialogue Myriam Bras, Laure Vieu, 2021-10-01 This volume addresses contemporary issues in the semantics and the pragmatics of discourse and dialogue Collected papers aim at providing insights on different theoretical approaches all of them in the dynamic semantics tradition such as Dynamic Predicate Logic DPL Discourse Representation Theory DRT and Segmented Discourse Representation Theory SDRT They reflect the current move of formal semantics from short multisentential texts towards structured discourses and dialogues accounting for more and more phenomena at the semantics pragmatics interface such as subtleties of anaphora and presupposition the role of temporal connectives in discourse or the establishment of common references in dialogue

Perspectives on Semantics, Pragmatics, and Discourse Ferenc Kiefer, István Kenesei, Robert M. Harnish, 2001-01-01 Professor Ferenc Kiefer of the Linguistics Institute of the Hungarian Academy of Sciences was instrumental in bringing early transformational grammar to Europe His extensive work contributes substantially to making a connection between the grammatical theory and other areas of linguistics The 17 essays in this book celebrate his career by continuing to explore inter area research in linguistics pragmatics in grammar de Groot van Riemsdijk Dressler Barbaresi Comrie semantic compositionality and pragmatics Wunderlich Partee Borschev Szabo Bach logical structures and universals in semantics and pragmatics van der Auwera Bultinck Burton Roberts Harnish Wierzbicka dialogue and thematic structure Jonasson Doherty Hajicova Panevova Sgall Allwood Fraser

Applicable Linguistics and Social Semiotics David Caldwell, John S. Knox, J. R. Martin, 2022-10-06 Exploring the relationship between theory and practice in Systemic Functional Linguistics SFL this volume offers a state of the art overview of Applicable Linguistics Featuring both internationally renowned scholars and rising stars from Argentina Australia Austria Brazil Chile Denmark Indonesia New Zealand Singapore and the USA Applicable Linguistics and Social Semiotics examines the theoretical insights questions and developments that have emerged from the application of Systemic Functional theory to a range of fields Beyond simply reporting on the application of SFL to particular sites of communication both linguistic and semiotic this volume demonstrates how SFL has critiqued developed and transformed theory and practice and foregrounds the implications of application for Systemic Functional theory itself Covering established fields for application such as education medicine and media to relatively uncharted areas such as software design and extremist propaganda this volume provides an overview of recent linguistic and semiotic innovations informed by SFL and examines the advances that have been made from many years of productive dialogue between theory and practice

Situations and Speech Acts David A. Evans, 2016-11-18

First published in 1985 this book aims to develop an approach to speech acts that has the virtue of being straight forward explicit formal and flexible enough to accommodate many of the more general problems of interactive verbal communication The first chapter introduces situation semantics with the second addressing the assumptions implied by the problem of representing speaker intentionality The third chapter presents a streamlined theory of speech acts and the fourth tests the predictions of the theory in several hypothetical discourse situations A summary and suggestions for further research is provided in chapter five and appendices facilitate reference to key concepts

Speech and Language Engineering

Martin Rajman, 2007-04-20 Efficient processing of speech and language is required at all levels in the design of human computer interfaces In this perspective the book provides a global understanding of the required theoretical foundations as well as practical examples of successful applications in the area of human language technology The authors start from acoustic signal processing to pragmatics covering all the important aspects of speech and language processing such as phonetics morphology syntax and semantics

Drawing multimodality's bigger picture: Metalanguages and corpora for multimodal analyses Janina Wildfeuer, Claudia Lehmann, 2024-07-30 Multimodality has most recently been described no longer as a research field or discipline on its own but rather as a stage of development within a field Bateman 2022a 49 The realization that 1 many different fields and disciplines now enter their own multimodal phase with new interest in multimodal phenomena and that 2 these disciplines all commit to the development of multimodality research with their own theoretical principles and methodological tools brings with it not only an immense breadth of potential analytical objects but also many new meta methodological issues We need to find ways of combining insights from the variously imported theoretical and methodological backgrounds brought along by previous non multimodal stages of any contributing disciplines Bateman 2022a 49 At the same time the search for a meta methodology for multimodal analyses is pushed further by the recent trend towards more empirical approaches to multimodal phenomena and the development and use of larger multimodal corpora that just as well require theoretical and methodological refinements We need to develop ways of strengthening claims with robustly applicable methods which nevertheless remain firmly anchored theoretically Bateman 2022b 64 For a productive handling of these issues disciplinary triangulation and finding a common language or metalanguage Maton newest results from data collection methods and multimodal corpus analyses that expand the current quantitative work by e.g. applying existing theories and methods to larger datasets or exploring the newest communication technologies We are particularly interested in seeing how works addressing these aspects contribute to finding ways of productive triangulation and integration for and within a meta methodology for multimodality research This Research Topic aims to bring together scholars from a variety of disciplines interested in multimodality research to review explore and advance the contributions that John Bateman as one of the key figures in multimodality research has made to both theory and method building as well as to the driving forward of multimodal empirical and corpus analyses We welcome contributions that for example critically

address the theoretical and methodological advancements that John Bateman has made with regard to the notions of semiotic mode discourse semantics genre textuality etc apply one of the many approaches that John Bateman has developed for the empirical analysis of multimodal artefacts e g the GeM model for page based documents his work on multimodal film and audio visual analysis and the discourse semantics and or annotation approach to visual narratives to larger corpora or currently newly developing communicative situations expand on one of the abovementioned aspects with new ideas and insights from disciplines that have not yet been included in multimodality research A View of Language Pieter A. M. Seuren,2001 This book collects the best and most influential essays of one of the world s most original linguistic scholars and thinkers They show Pieter Seuren s remarkable erudition from classical antiquity to current theory his descriptive and theoretical sophistication and his beautiful clarity of style They provide many examples of the cogency of his argument and his willingness to speak out trenchantly against accepted wisdom In the extensive introduction the author describes the evolution of his theoretical position and its development in relation to Chomskyan syntactic theory and model theoretic semantics He argues here and throughout the book that grammar and semantics should be studied as branches of cognitive science not as mere formalisms He propounds develops and applies a theory of semantic syntax in which a grammar is seen as a mediating device between propositionally structured thoughts and corresponding surface structures He rejects conventional notions of autonomous grammar as unsustainable and in a realist theory of language unnecessary He demonstrates that his semantic theory achieves empirically adequate and formally precise explanatory generalizations developing a theory of discourse semantics as a means of providing elegant accounts of topic comment structure The twenty two essays are divided into four parts dealing broadly with general theory syntax semantics and the linguistics of creole languages Many of the author s classic papers will be found here including those on autonomous versus semantic syntax predicate raising and datives clitic pronoun clusters donkey anaphora every man who owns a donkey beats it serial verb constructions and many more Provocative and thoughtful accessible and entertaining they add up to a book of real enduring value **Discourse Contextualism** Alex Silk,2016 Alex Silk investigates the role of context in the meaning and use of natural language His text provides a systematic account of the distinctive ways in which speakers use context sensitive expressions to coordinate their attitudes and negotiate about how the context should evolve

Journal of Semantics ,1984
Discourse as Structure and Process Professor Teun A. van Dijk,1997-02-11 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do
