## 1. Introduction

The disciplinary problem among the students is one of the big challenges for education in our country nowadays. The problem becomes serious when the students lost their moral compass to discern what is right and wrong for their actions in school or out of the school. It is undeniable that the problem is due to the low morality level among the students. Morality is principles that concern the difference between right and wrong action or good and bad behavior. Morality is important and needed to be taught in school to produce students who are balanced and harmonious in intellectual, spiritual, emotional and physical aspects based on the National Philosophy of Education.

Besides the parents who should take the responsibilities in building their children' morality, school also plays an important role as the institution which promotes moral development and transmits the moral values for the

students. Moral Education has been employed in education system since 1983 in Malaysia. In school, teachers act as 'surrogate parents' to the students who take over the responsibilities not only in teaching, but also in building the students' morality. As adult is the guide for the students, it is important for the teachers to have good knowledge of the moral subject, teaching pedagogy and they ought to be mature emotionally and able to interact with the students and communicate with the parents.

Thus, it is important for them to know more about their roles and challenges in developing students' morality. Teachers can have a better direction to play their roles and try to solve the challenges that they face in developing students' morality in the classroom.

In 2017, there were 402 Malaysia schools that were found having disciplinary and drug issues. Although moral education is implemented in every school and the teachers have been teaching and inculcating moral values to the students, the issue of school discipline still makes the headlines (Kok, 2018). When the discipline issue arises, besides the parents, the role of teachers in developing morality of students will be questioned in the society since their expectation on teachers' responsibilities is high nowadays. The responsibilities of teachers are not only teaching students, but also helping students to develop in every aspect including morality.

Nowadays, the role of teachers becomes more challenging. They are the second parents of their students who take their responsibilities in educating and taking care of the students in the school. The expectation on the teachers is getting higher especially when the students are exposed to a variety of resources, social media and gadgets in this era. According to Morgan (2016), students spend too much time online and this will affect their moral development. The aggressive content from the media social will affect students' decision making and conduct in real life situation. Teachers need to know about their responsibilities and play their role in navigating the
