Screw School! How to Find Your Genius in 21 Days Omar

Al-Attas,2013-10-02 Have you ever thought that going to school was probably one of the biggest mistakes of your life I did What was the single most beneficial lesson you learned in class that you still use today that has advanced your character and made you a better person What am I getting at I believe that if you never set the target you will never hit it If you came to school knowing nothing except to be the first kid in class than you re going to have a bad time I did I hated the competition Not because it wasn t fun I despised it because I was bad at it Being the last in my class during my third year of elementary school wasn t something I could brag about Does that make you any dumber Maybe You won t let anyone judge the value of your character by the car you drive So why let anyone gauge your intellect by the grade you received in college or high school My intention for this book is to express and vent my dissatisfaction towards the current education system that most countries in the world are adopting I advise you to do your own research on the subject My main point isn t to whine and complain about my entire boohoo and why me moments It is to point out how the roots and causes beneath this seemingly flawless system Please I invite you to open your window to new concepts and ideas that would push you and irritate you in the right places But I promise you that upon putting this book down you would possess a burning desire to pursue your own path of self education If you walk to any school today and start walking into any classroom What gut level feeling would you have if you had no choice but to go through elementary school all over again Sounds fun right With the awareness and the intelligence that you already have right now you could probably observe the inefficiency of how information is transported from the teacher to the student You could sense how the attitude of the teacher is paramount in how he or she approaches

the student If the teachers were friendly fun and engaging the effect would be a more effective and educational class A condescending teacher on the other hand would set the student off to boredom or would just tick the students off Let us walk further into this conundrum and try to understand the problems that are happening and how we could do something about it to make it better

The Genius Checklist Dean Keith Simonton, 2018-10-02 What it takes to be a genius nine essential and contradictory ingredients What does it take to be a genius A high score on an IQ test Brilliant physicist Richard Feynman s IQ was too low for membership in Mensa Suffering from varying degrees of mental illness Creativity is often considered a marker of mental health Be a child prodigy like Mozart or a later bloomer like Beethoven Die tragically young like Keats or live to a ripe old age like Goethe In The Genius Checklist Dean Keith Simonton examines the key factors in creative genius and finds that they are more than a little contradictory Simonton who has studied creativity and genius for more than four decades draws on both scientific research and stories from the lives of famous creative geniuses that range from Isaac Newton to Vincent van Gogh to Virginia Woolf He explains the origin of IQ tests and the art of estimating the IQ of long dead historical figures John Stuart Mill 200 Charles Darwin 160 He compares IQ scores with achieved eminence as measures of genius and he draws a distinction between artistic and scientific genius He rules out birth order as a determining factor in the James family alone three geniuses at three different birth order positions William James first born Henry James second born Alice James born fifth and last considers Malcolm Gladwell s 10 000 hour rule and describes how the lone genius gets enmeshed in social networks Genius Simonton explains operates in ways so subtle that they seem contradictory Genius is born and made the domain of child prodigies and their elders Simonton s checklist gives us a new integrative way to understand geniuses and perhaps even to nurture your own genius

Become a Genius in 7 Steps Stephen Mekolle, 2019-06-06 Everyone wants a happy life but not everybody is willing to do what it takes to get there Many people who have been successful tell others to do the work or they often say you need the right mindset but no one tells you how to create that right mindset After many years of training as an individual and as a scientist i thought everybody needed a chance or a better approach before going through the life of an entrepreneur to create many streams of income To create many streams of income you need to know what to do with yourself as a product and not only a niche especially where you use other people products Success is a journey and in this book you will learn how to define your destiny in less than seven words to avoid confusion in your brain and help you create an incomparable business This will help you save time and money You will not have to worry about any competition nor any risk of failure It will also prepare you for the future that awaits you Anyone can become a genius and this depends only on you Many people want the peace and money but very few are ready to give peace and make the money Consumption and production and definitively two different things and that is why you have to go through this journey to secure your position in the society you will choose In this book you will find numerous schemes that have the aim to transform your brain and inflict in it the right mindset or concepts to get every job done by the simple

activation of your brain The activation of your brain is the right mindset and it takes you away from your comfort zone automatically You will not need to be convinced from the moment you discover what your brain is capable of doing When i discovered my destiny i created more that 60 online training videos in one month i wrote sixteen relevant books of great content in 4 months while doing three jobs of roughly 60 hours a week You will say this is insane but i will tell you that i did it with pleasure and i can t stop today because it gets me more and more excited I discovered energy and i know who i am and who you are All you have to do is learn how to use your energy how to create and grow your potential and how not to waste it You already have everything you need but you need to know how to start and where to start This is where and how you should start by defining your destiny in less than seven words increase your reading and memory capacities to accelerate your education grow your self esteem to know who you are and how to increase your potential increase your mental equilibrium to control or react positively and correctly to control the world around you and increase you patience and courage to overcome every difficulty automatically before getting seriously into any business that you didn t create However remember that we learn from errors and whatever error you make you need to thank the universe You may have material riches but it takes a second to lose everything If you consider your brain the most important instrument in your world you can have and reproduce everything if you lose your material belongings You can transform your brain into a learning machine with lots of ease This is where your future starts and continues Free your mind and fill it with love as you go on through this journey of success Before you continue reading this book note that there are rules in this game The first rule is that there is no rule because you are the rule and you get just what you think or say So if you are negative at that is all you will get If you think and say only positive things even if you do not understand thank the universe and forgive yourself for not understanding You have more that one milion things happening around you and you get to notice not less that twenty things at a time and this keeps you unnecessarily worried Remain excited althrough these steps and apply what you learn No action no results more actions more results
