Discovery And The Capitalist Process:

Discovery and the Capitalist Process Israel M. Kirzner, 1985 Foundations of Entrepreneurship and Economic Development David A Harper, 2003-03-13 This well written book is the first to deal with entrepreneurship in all its aspects It considers the economic psychological political legal and cultural dimensions of entrepreneurship from a market process perspective David A Harper has produced a volume that analyses why some people are quicker than others in discovering profit opportunities Importantly the book also covers the issue of how cultural value systems orient entrepreneurial vision and in contrast to conventional wisdom the book argues that individualist cultural values are not categorically superior to group oriented values in terms of their consequences for entrepreneurial discovery **Historical Foundations of Entrepreneurial Research** Hans Landström, Franz Lohrke, 2010-01-01 The authors present an historical perspective on the development of empirical research into entrepreneurship China's Long and Winding Road to Modernization Fu-Lai Tony Yu, Diana S. Kirzner, 2016 *Discovery Capitalism and Distributive Justice* makes Kirzner's case for the idea that entrepreneurial profit is both essential for an economy and profoundly just Asserting that the problem with standard criticism of capitalist income distribution is a failure to see capitalism as a discovery procedure Kirzner argues that production and subsequent profit are neither automatic nor guaranteed This important contribution to the larger debate of the capitalist system clarifies core economic issues so that the positive science of economics can enlighten our understanding of justice in capitalist distribution Successful production always results from the discovery of an opportunity to obtain new gains from trade i.e the discovery of

entrepreneurial profit Kirzner shows that profit is the just and fair possession of its discoverer This is what he calls the finders keepers rule The finders keepers rule asserts that an unowned object becomes the justly owned property of the first person who discovering its availability and its potential value takes possession of it Richard Ebeling reviewed the work in 1989 saying the heart of Professor Kirzner s argument is that every discovery of a new opportunity is the appropriation of that which had not existed before a human mind had seen the potential in that object Kirzner s monograph is complemented here by three important articles on the subject of economic justice a critique of Kirzner s theory and a reply from Kirzner to that critique Kirzner s finders keepers rule of entrepreneurial profit and market distribution stands as one of the foremost defenses of the distribution of income and profit in the free enterprise system Israel M Kirzner is a leading economist in the Austrian School and Professor Emeritus of Economics at New York University Peter J Boettke is University Professor of Economics and Philosophy at George Mason University and the BB T Professor for the Study of Capitalism at the Mercatus Center His publications include *Living Economics The Handbook of Contemporary Austrian Economics* and *The Elgar Companion to Austrian Economics* He has been the editor of *The Review of Austrian Economics* since 1998 Fr d ric Sautet is Associate Professor at The Catholic University of America School of Business and Economics He is a specialist in Austrian market process theory and teaches entrepreneurship studies He has taught at George Mason University of Paris Dauphine He is the author of *An Entrepreneurial Theory of the Firm* and has published widely on entrepreneurship *The Austrian Economics Study Guide* ,1995 **The Ethical Foundations of the Market Economy** Horst Siebert,1994 France Encounters Globalization Peter Karl Kresl,Sylvain Gallais,2002 This work examines the French economy and how it is adjusting to the exigencies of an increasingly globalized environment It deals with issues challenges and processes of change and adaptation that are facing all of Europe and other countries **Science & Public Policy** ,2003 **Les déterminants économiques de l'innovation** Randall Morck,Bernard Yeung,Canada. Fiet, Pankaj C. Patel, 2008 In the only known programme of prescriptive entrepreneurship James Fiet provides a marked contrast to the standard descriptive focus of entrepreneurship studies. Instead of the anecdotally based pedagogies that have dominated the teaching of entrepreneurship and which do not control for luck based success, the author lays out a programme of research to develop and test theoretically derived guidelines for how to improve the success rate and performance of aspiring entrepreneurs. Rather than describing what entrepreneurs do, he prescribes and tests what they ought to do. The author finds that the use of systematic search at the launch relates positively to both the discovery of wealth generating ideas and the founding of ventures. The book also uncovers the characteristics of forgiving business models and discusses their teachability. Training elements of the book include a prescriptive model of how to search for and discover wealth generating ideas, a detailed protocol for how to train aspiring entrepreneurs in the use of systematic search, and an instrument that allows aspiring entrepreneurs to test the potential of their ideas before launching a venture. The book will be of interest to business and entrepreneurship scholars and teachers, students and aspiring entrepreneurs who are looking for prescriptive tools to help them launch a successful business. *Books in Print*, 1994 *Regulating Utilities* Stephen Sayer, Bryan V. Carsberg, 1996 Now that privatisation of utilities is substantially complete, regulation has become a major economic and political issue. To provide an intellectual basis for utility regulation, each year the Institute in conjunction with the London Business School publishes a set of Readings which assess the state of regulation, considers the state of regulation, considers what problems have arisen and discusses how they might be solved, taking into account the experiences of other countries. The authors adopt no common political or ideological stance; they bring a variety of viewpoints to bear since the intention is to stimulate debate. The 1996 edition of this comprehensive and up to date review of utility regulation in Britain includes contributions not only from academic commentators but from the utility regulators and the heads of the general competition authorities. *Government Union Review*, 1990
