## **Discovery Of America:**

*The Discovery of North America* William Patterson Cumming, Raleigh Ashlin Skelton, David B. Quinn, 1972 This volume presents the discovery and exploration of the North American continent from the earliest references down to the first permanent settlements as described by the explorers themselves and delineated by contemporary Europeans The vivid narratives of those who first sailed along its coasts penetrated the unknown interior with its primeval forests wide rivers and hostile inhabitants man and beast are richly supplemented by the drawings of the explorers and by the conceptions of the land which they brought back to European mapmakers and artists The geographical misconceptions of the discoverers strange and absurd as they seem to us now were exciting stimulating and often disastrous to the adventurers who came to seek wealth or freedom or glory in the new land The illustrations are taken from rare contemporary records manuscript and engraved maps and original paintings of the period Each section of the volume has an introductory historical essay which binds together the original narratives and the accompanying illustrations the possible pre Columbian explorations the emerging knowledge of the east coast from Cabot to Cartier the Spanish penetration of the southern interior and discoveries along the west coast the sixteenth century attempts at colonization the search for a North west Passage and the beginnings of permanent settlement in the early seventeenth century Among the early explorers some were officially appointed to make discoveries John Cabot who held a patent for his first voyage from Henry VII of England was one Others like Francis Drake on his voyage of 1578 were engaged in the opening up of trade although exploration and plunder were subsidiary activities The epic wanderings of the Spanish into the interior were stimulated by the lure of supposed immense riches like those already plundered from South America The narratives of these amazingly tenacious explorers such as de Soto and Coronado are in sharp contrast to those written by the men who came to colonize and settle At Fort Caroline the French colony under Laudonniere included the artist Le Moyne and the many engravings of his paintings reproduced with his own comments provide a lively picture of Indian life and customs From the English settlement of 1585 in Virginia come the paintings of John White and the accompanying notes of Thomas Harriot settler mathematician and scientist But the hope of finding a shorter route to Cathay and the Spice Islands was so persistent that men like Frobisher and Davis made several voyages to the far north in search of a North west Passage and Henry Hudson died in that search The book is an Anglo American partnership the authors are authorities in their fields Professor W P Cumming is the author of *The Southeast in early maps* and numerous other books and articles on colonial American history and cartography as Guggenheim Fellow he spent a year in European libraries and archives searching for and examining documents and maps relating to the colonial period of North America The late Dr R A Skelton former superintendent of the British Museum Map Room long honorary secretary of the Hakluyt Society editor of *Imago Mundi* was the author of *Explorers Maps The Vinland Map* and other works His sudden death occurred within a week of his final examination of the proofs of this work and it ended a career which established his pre eminence

**Terra Cognita** Eviatar Zerubavel,2018-04-17 Most of us are fascinated by the conventional storybook account of Christopher Columbus heroic discovery of America in 1492 Yet should the credit for discovering America go to a man who insisted it was but a few islands off the shores of China In *Terra Cognita* Eviatar Zerubavel argues that physical encounters are only one part of the complex multifaceted process of discovery Such encounters must be complemented by an understanding of the true identity of what is being discovered The small group of islands claimed by Columbus to have been discovered off the shores of Asia was a far cry from what we now call America The discovery of the New World was not achieved in a single day but was a slow process mental as well as physical that lasted almost three hundred years By celebrating 1492 as a year of discovery we inevitably distort the reality of history In vividly documenting how a slowly emerging New World gradually forced itself into Europe s consciousness Zerubavel shows that Columbus did not discover America on October 12 1492 Supplemented by fascinating old maps and a new preface written for this paperback edition *Terra Cognita* will be of interest to historians geographers cognitive scientists sociologists and students of culture
