Cases In Decision Making:

Magistrates' Decision-Making in Child Protection Cases Rosemary Sheehan, 2018-02-06 This title was first published in 2001 Making decisions about the care and protection of children who appear before the courts is complex Attention must be paid to the best interests of the child the child's need for their family community views on parenting and concern about welfare intrusion into family life Magistrates have a unique authority to make or reject child protection orders yet the criteria they use to decide a protection order how they understand the information presented to them in court and the factors that influence their discretion and decision making have until now been little known Presenting the findings of a study undertaken at Melbourne Children's Court this book offers a much needed investigation of how magistrates actually make child protection decisions Case examples highlight this decision making and the book thus offers practical assistance to professionals working with children in the legal process Encyclopedia of Decision Making and Decision Support Technologies Adam, Frederic, Humphreys, Patrick, 2008-04-30 As effective organizational decision making is a major factor in a company's success a comprehensive account of current available research on the core concepts of the decision support agenda is in high demand by academicians and professionals Through 110 authoritative contributions by over 160 of the world's leading experts the Encyclopedia of Decision Making and Decision Support Technologies presents a critical mass of research on the most up to date research on human and computer support of managerial decision making including discussion on support of operational tactical and strategic decisions human vs computer system support structure individual and group decision making and multi criteria decision making **MIS Cases** M. Lisa Miller, 2003 A casebook to complement most MIS/CIS textbooks Designed to demonstrate how software can support managerial decision making activities this casebook features 20 cases more than another casebook currently on the market that cover functional areas of the firm are spread across three difficulty levels basic intermediate and advanced and require students to apply spreadsheet database Web page development and or presentation graphics software often in an integrated manner The cases present common managerial issues and problems and encourage students to actually use their models to make decisions for the case's characters Many of the cases require students to prepare both written and oral presentations of their solutions **Real-Life Decision-Making** Mats Danielson, Love Ekenberg, 2023-08-08 Have you ever experienced a decision situation that was hard to come to grips with Did you ever feel a need to improve your decision making skills Is this something where you feel that you have not learned enough practical and useful methods In that case you are not alone Even though decision making is both considered and actually is a very important skill in modern work life as well as in private life these skills are not to any reasonable extent taught in schools at any level No wonder many people do indeed feel the need to improve but have a hard time finding out how This book is an attempt to remedy this shortcoming of our educational systems and possibly also of our common partly intuition based decision culture Intuition is not at all bad quite the contrary but it has to co exist with

rationality We will show you how Methods for decision making should be of prime concern to any individual or organisation even if the decision processes are not always explicitly or even consciously formulated All kinds of organisations as well as individuals must continuously make decisions of the most varied nature in order to prosper and attain their objectives A large part of the time spent in any organisation not least at management levels is spent gathering processing and compiling information for the purpose of making decisions supported by that information The same interest has hitherto not been shown for individual decision making even though large gains would also be obtained at a personal level if important personal decisions were better deliberated This book aims at changing that and thus attends to both categories of decision makers This book will take you through a journey starting with some history of decision making and analysis and then go through easy to learn ways of structuring decision information and methods for analysing the decision situations beginning with simple decision situations and then moving on to progressively harder ones but never losing sight of the overarching goal that the reader should be able to follow the progression and being able to carry out similar decision analyses in real life situations The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Decision Making in Child Welfare Services T.J. Stein, T.L. Rzepnicki, 2012-12-06 All countries confront the problem of providing for dependent neglected and 1 abused children While the exact form of institutional response will differ in relation to a country's political and economic structure its culture and its tradition the same general kinds of child welfare services have been developed 2 everywhere Literature from the United States Canada and several Western European countries reflects a shared concern about children who reside in unplanned substitute care arrangements and a growing recognition of the importance of 3 making permanent plans for these children The American response to this problem took shape in the early 1970s when government at the local state and 4 federal levels undertook to fund permanency planning projects Permanency planning projects were charged with developing and testing procedures that would increase the likelihood that children would move out of substitute care arrangements into permanent family homes either through restoration to their biological families termination of parental rights and subsequent adoption court appointment of a legal guardian or planned emancipation for older children Long term foster care if it was a planned outcome supported by the use of written agreements between foster parents and child care agencies was recognized as an appropriate option for some children 2

DECISION MAKING IN CHILD WELFARE Permanency planning projects have had a direct effect on the substantive aspects of social work practice in child welfare **Federal Parole Decision-making**, 1978 [Groupthink Versus High-Quality Decision Making in International Relations](#) Mark Schafer, Scott Crichlow, 2010-04-22 Are good and bad outcomes significantly affected by the decision making process itself Indeed they are in that certain decision making techniques and practices limit the ability of policymakers to achieve their goals and advance the national interest The success of policy often turns on the quality of the decision making process Mark Schafer and Scott

Crichlow identify the factors that contribute to good and bad policymaking such as the personalities of political leaders the structure of decision making groups and the nature of the exchange between participating individuals Analyzing thirty nine foreign policy cases across nine administrations and incorporating both statistical analyses and case studies including a detailed examination of the decision to invade Iraq in 2003 the authors pinpoint the factors that are likely to lead to successful or failed decision making and they suggest ways to improve the process Schafer and Crichlow show how the staffing of key offices and the structure of central decision making bodies determine the path of an administration even before topics are introduced Additionally they link the psychological characteristics of leaders to the quality of their decision processing There is no greater work available on understanding and improving the dynamics of contemporary decision making

Decision-Aiding Software and Legal Decision-Making Stuart S. Nagel,1989-09-26 The use of microcomputers as decision aids in law practice is increasing rapidly Nagel here shows how developments in software over the last few years are making microcomputers practically indispensable to lawyers as decision aids This is in contrast to his earlier book on Microcomputers as Decision Aids in Law Practice It dealt speculatively with ways in which decision aiding software could be used by lawyers for judicial prediction litigation strategy allocating scarce resources and negotiation mediation The book is divided into three parts covering general developments specific lawyer skills and application to all fields of law The first part previews various uses of decision aiding software by practicing lawyers including a general discussion of the potential and actual benefits of such software How decision aiding software enhances specific lawyer skills comprises the second and largest part of the work Among the topics discussed are computer aided counseling computer aided mediation legal policy evaluation and computer aided advocacy law prediction and legal administration In the third part Nagel assesses applications of decision aiding software to all fields of law with an emphasis on contracts property torts family law criminal law constitutional law economic regulation international law civil procedure and criminal procedure In a provocative concluding chapter he deals with the thorny issues of individual ethics and professional responsibility in the context of microcomputers Because decision aiding software encourages decision makers to be much more explicit about their goals than they otherwise would be its use raises questions as to whose goals should be pursued and to what degree This is a nuts and bolts guidebook that will be a valuable tool for practicing attorneys with some knowledge of microcomputers and is recommended reading for legal scholars and law students
