Castration and Culture in the Middle Ages Larissa Tracy, 2013 Essays exploring medieval castration as reflected in archaeology law historical record and literary motifs Castration and castrati have always been facets of western culture from myth and legend to law and theology from eunuchs guarding harems to the seventeenth and eighteenth century castrati singers Metaphoric castration pervades a number of medieval literary genres particularly the Old French fabliaux exchanges of power predicated upon the exchange or absence of sexual desire signified by genitalia but the plain literal act of castration and its implications are often overlooked This collection explores this often taboo subject and its implications for cultural mores and custom in Western Europe seeking to demystify and demythologize castration Its subjects include archaeological studies of eunuchs historical accounts of castration in trials of combat the mutilation of political rivals in medieval Wales Anglo Saxon and Frisian legal and literary examples of castration as punishment castration as comedy in the Old French fabliaux the prohibition against genital mutilation in hagiography and early modern anxieties about punitive castration enacted on the Elizabethan stage The introduction reflects on these topics in the context of arguably the most well known victim of castration in the middle ages Abelard LARISSA TRACY is Associate Professor of Medieval Literature at Longwood University Contributors Larissa Tracy Kathryn Reusch Shaun Tougher Jack Collins Rolf H Bremmer Jr Jay Paul Gates Charlene M Eska Mary A Valante Anthony Adams Mary E Leech Jed Chandler Ellen Lorraine Friedrich Robert L A Clark Karin Sellberg Lena W nggren

Black Ops and Beaver Bombing Fiona Mathews, Tim Kendall, 2023-04-27 From central Glasgow to rural Wiltshire a husband and wife team track down Britain's rarest and most enigmatic animals Weasely my favourite book of the year Dave Goulson author of *Silent Earth* A COUNTRYFILE AND WATERSTONES BEST NATURE BOOK OF 2023 Britain is teeming with wildlife often in the most unexpected places There are quarries where rare bats hang out with pot smoking teens In Glasgow's urban parks water voles are thriving without water Our coastlines are bustling with grey and harbour seals That's the good news The bad news is that a quarter of British mammals are at imminent risk of extinction Tim Kendall and Fiona Mathews take us on a safari unlike any other Armed with binoculars a Thermos and regrettably an inexhaustible supply of puns they travel from Scotland to the Isles of Scilly in search of their elusive subjects You'll find answers to questions you never thought to ask Do pine marten droppings really smell like Parma Violets Should we give squirrels access to family planning And what do wild boar have in common with a certain royal *Black Ops and Beaver Bombing* is a celebration of Britain's marvellous mammals and a rallying cry to save them SHORTLISTED FOR THE WAINWRIGHT PRIZE A cracking book which shares fascinating stories from the new frontlines of nature conservation readable and entertaining The passion and humour of the authors comes through on every page Craig Bennett Chief Executive of The Wildlife Trusts Elegiac informative and funny some truly magical encounters in the wild Peter Fiennes author of *Oak and Ash* and *Thorn Spring* has barely ticked over into summer but I've already found the book that I'll be

recommending for the rest of the year Countryfile Packed full of useful information and acutely up to date As she s one of the ablest mammalogists of our age it s well worth listening to Fiona Mathews I would heartily recommend this book to all Derek Gow author of Bringing Back the Beaver Colors and Textures of Roman North Africa Elizabeth A. Clark,Zachary B. Smith,2023-09-08 This book serves two purposes first it celebrates the career of the late Maureen Tilley second it provides a state of the field look at some of the latest scholarship on Christian North Africa in late antiquity The chapters written by both senior scholars and the next generation of North African researchers fills gaps in some of our understandings of the colorful people places and disputes that arose in the unique environment of Christian North Africa The book centers around Augustine Donatist studies and North African biblical interpretation representing Tilley s major areas of interest while also ensuring coverage of Tertullian a major figure in the North African church and one of Tilley s hobbyhorses and the pilgrimages to North Africa and other places It contributes to the field s by providing new scholarship from some of the biggest names in Christian North Africa studies Patout Burns Robin Jensen Bill Tabbernee Anthony Dupont and Allan Fitzgerald and in Patristic early Christian studies writ large Blake Leyerle and Geoffrey Dunn while demonstrating the new trajectories of Christian North Africa research from early career Alden Bass and emerging Colum Dever scholars The editors were Tilley s dissertation director the late Liz Clark and one of her last mentees Zach Smith so the entire collection has a meta view of academic genealogy knowledge flowing from Tilley s mentor through colleagues and mentees and down through and to the next generation who carry on those legacies Aelian's On the Nature of Animals Gregory McNamee,2012-08-31 Not much can be said with certainty about the life of Claudius Aelianus known to us as Aelian He was born sometime between A D 165 and 170 in the hill town of Praeneste what is now Palestrina about twenty five miles from Rome Italy He grew up speaking that town s version of Latin a dialect that other speakers of the language seem to have found curious but somewhat unusually for his generation though not for Romans of earlier times he preferred to communicate in Greek Trained by a sophist named Pausanias of Caesarea Aelian was known in his time for a work called Indictment of the Effeminate an attack on the recently deceased emperor Marcus Aurelius Antoninus who was nasty even by the standards of Imperial Rome He was also fond of making almanac like collections only fragments of which survive devoted to odd topics such as manifestations of the divine and the workings of the supernatural His De Natura Animalium On the Nature of Animals has a similar patchwork quality but it was esteemed enough in his time to survive more or less whole and it is about all that we know of Aelian s work today A mostly randomly ordered collection of stories that he found interesting enough to relate about animals whether or not he believed them Aelian s book constitutes an early encyclopedia of animal behavior affording unparalleled insight into what ancient Romans knew about and thought about animals and of particular interest to modern scholars about animal minds If the science is sometimes sketchy the facts often fanciful and the history sometimes suspect it is clear enough that Aelian had a fine time assembling the material which can be said in the most general terms to support

the notion of a kind of intelligence in nature and that extends human qualities for good and bad to animals His stories which extend across the known world of Aelian s time tend to be brief and to the point and many return to a trenchant question If animals can respect their elders and live honorably within their own tribes why must humans be so appallingly awful Aelian is as brisk as entertaining and as scholarly a writer as Pliny the much better known Roman natural historian That he is not better known is simply an accident he has not been widely translated into English or indeed any European language This selection from his work will introduce readers to a lively mind and a witty writer who has much to tell us *Nature's Biodiversity* Joseph Heller,2025-06-02 This book is about our quest over the centuries from ancient Greece onwards for pattern in the rich diversity of life How did our ancestors think that living creatures first came to be each fitting so well to its specific environment Does biodiversity have a purpose What biodiversity exists beyond what our eyes can see Do dragons and unicorns exist How did the world begin how did order emerge and were there several Creation events Reproduction resembles Creation in that order appears out of nothing form out of matter Can different reproduction modes increase biodiversity Why sexual reproduction Can living creatures and hence biodiversity arise from non living dust How do embryos develop from a featureless mass into an orderly organised living body Does embryonic development dictate diversity and do species ever go extinct What is a soul Do animals have souls Do souls migrate between man and animal Does inheritance of acquired characters create biodiversity Does diversity form an orderly ladder from plants through animals to Man or perhaps orderly circles within circles These questions and many others have been central to our culture s overall view of nature from ancient times onwards This book presenting the urge to understand overall pattern in the diversity of life throughout history takes a broad approach It links theories of classification with those of reproduction embryology theology and eventually evolution as they developed from ancient days onwards over 2400 years Over 250 illustrations accompany the text many taken from the ancient original treatises many others painted especially for this book to present specific animals or ideas This comprehensive view of the study of biodiversity will appeal to zoology lecturers and students biology teachers and amateur naturalists as well as to lecturers and learners of history of theology and of course to anybody seeking to broaden horizons The Psychoanalytic Review ,1927 **The Century Dictionary and Cyclopedia: The Century dictionary ... prepared under the superintendence of William Dwight Whitney ... rev. & enl. under the superintendence of Benjamin E.
