Interests And Institutions Substance And Structure In American Politics:

Interests and Institutions Robert H. Salisbury, 1992-10-15 Interest and Institutions is a collection of essays written by distinguished political scientist Robert Salisbury a leading analyst of interest group politics He offers his theories on the workings and influence of groups organizations and individuals in many different areas of American politics **Lobbying in America** Ronald J. Hrebenar, Bryson B. Morgan, 2009-03-03 A comprehensive presentation of the way lobbying and interest based political activism works in the United States Lobbying in America A Reference Handbook offers readers an insightful survey of interest group politics in the United States the strategies techniques and impact both positive and negative Written by one of the nation's premier scholars on the subject it reveals the inner workings of the lobbying process like no other volume before it Lobbying in America traces the growth of interest groups from the nation's infancy to the present The book examines a range of related issues and controversies including infamous scandals attempts to regulate lobbying and the overriding constitutional question of whether limiting money in politics is an infringement of free speech Comparisons to lobbying systems in other countries as well as listings of key organizations and an extensive bibliography round out a volume that could not be more timely **The Organization Ecology of Interest Communities** Darren Halpin, David Lowery, Virginia Gray, 2016-04-29 This volume summarizes the origins and development of the organization ecology approach to the study of interest representation and lobbying and outlines an agenda for future research Multiple authors from different countries and from different perspectives contribute their analysis of this research program **The Population Ecology of Interest Representation** Virginia Gray, David Lowery, 1996 This examination of lobbying communities explores how interest group populations are constructed and how they influence politics and public policy By examining how populations of interest groups are comprised this work fills an important gap between existing theories of the origins of individual interest groups and studies of interest group influence The population ecology model of interest communities developed here builds on insights first developed in population biology and later employed by organizational ecologists The model's central premise is that it is the environmental forces confronting interest organizations that most directly shape the contours of interest populations After examining the demography of interest organizations in the fifty American states the population ecology model is used to account for variations in the density and diversity of their interest communities the nature of competition among similar interest organizations to establish viable niches and the impact of alternative configurations of interest communities on the legislative process and the policies it produces These empirical findings suggest that the environment of interest communities is highly constraining limiting their size composition and potential impact on politics Virginia Gray is Professor of Political Science University of Minnesota David Lowery is Burton Craige Professor of Political Science University of North Carolina at Chapel Hill **Lobbying Reconsidered** Gary Andres, Paul HERNANSON, 2015-11-17 Lobbying Reconsidered Politics Under the Influence reveals how lobbying is a complex process that

involves more than just relationships friends access favors and influence This book offers a broader perspective on this important dimension of American public policymaking As a person who straddles the worlds of Washington insider and interest group scholar author Gary Andres hopes to use his experience and insight in in the lobbying world to help readers navigate beyond the conventional wisdom and guide them to a deeper broader understanding The Logic of American Politics and Logic of American Politics in Wartime Pkg.
