Banking Reform ,1913 *Banking Reform (Classic Reprint)* J. Laurence Laughlin,2015-07-20 Excerpt from Banking Reform This volume is intended to furnish a plain untechnical exposition of the defects of our present banking and currency system together with a discussion of the remedies Not since the Civil War has the country been confronted with a monetary and banking question of greater importance to business prosperity The adequacy of the banking system affects the everyday existence of the laborer farmer and merchant The unnecessary expense of obtaining credit under a bad banking system is borne by the borrower the impossibility of getting loans in a time of panic shuts up factory and shop and falls most severely upon the wage earner who loses his employment Unemployment is largely increased by financial panics The reason for the existence of the National Citizens League which is made up of business men is found in the fact that the reform affects the borrowing business man more than the lending bank the bank can always protect itself by sacrificing the borrower There is practically no class in the community not directly concerned in the outcome of this campaign of education This book explains the effects of our banking system and of its reform on every class It has long been seen that our currency is needlessly inelastic that our credit system is even more dangerously inelastic that our large gold supply is ineffectively used that the scattering of reserves forbids co operative action by the banks in times of stress that our rigid reserve system even breeds panics that state banks and trust companies are doing commercial banking but without cooperation with national banks that our Independent Sub Treasury often attacks the reserves of banks at times of danger and works without business like economy and efficiency that idle funds of banks drift to New York and on call loans feed stock speculation and that our trade is greatly hampered by lack of American banking facilities in foreign countries About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Banking Reform in Transition Stijn Claessens,1999 August 1996 The institutional capacity of banks in transition economies improves faster when a new or parallel private banking system is allowed to emerge than it does when the

government tries simply to reform existing state owned banks Banking reform should stress decentralized institution building and penalties for weak banks In reforming the financial sector in transition economies one important debate is about whether governments should try to reform existing state owned banks the rehabilitation approach or whether a new private banking system should be allowed to emerge a new entry approach Or should there be a mix of the two approaches in which the activities of state banks are restricted while a parallel private banking system develops Claessens s cross country comparison of banks institutional development in 25 transition economies suggests that progress can be faster under the new entry approach especially relative to initial conditions Progress under the rehabilitation approach appears to be inhibited by poor incentives In most countries even those with a good banking infrastructure and a large segment of good banks a two track process has evolved with large and growing differences between weak and strong banks Whatever the banking reform approach taken weak banks have moved very little beyond central planning Regression estimates suggest that in transition economies three things are associated with slow progress of weak banks overconcentration preferential treatment by governments and limited entry for new banks The direction of causality is often unclear Policies and structural conditions can affect bank quality but whenever a banking system has a certain quality particular policies may also arise or structures exist The role of banks will remain limited in many transition economies because of weak legal infrastructures much uncertainty and inside information and problems associated with highly leveraged financial intermediaries including fraud political interference and implicit guarantees In the short run self finance and intermediation among enterprises and through nonbank financial institutions may prevail This paper a product of the Office of the Senior Vice President Development Economics was written as a background paper for World Development Report 1996 From Plan to Market Essays on Banking Reform in the United States Paul Moritz Warburg,1914 *Banking Reform* J. Polski,2012-12-06 This book is a product of my commitment to developing both theory and practice in political economy I first became interested in economic and institutional change in the commercial banking industry when I took a seminar on financial institutions led by Robert Glauber in the Kennedy School of Government at Harvard University in the spring of 1995 In my experience Bob is one of a handful of teachers who has the verve to challenge and inspire both esoteric and practical inquiry the seminar grappled with practical business and policy problems in a way that posed a significant challenge to existing theories In addition to demonstrating the need to better integrate theory and practice it provided a perspective and an approach that I continue to find useful in research consulting and teaching Conducting the research for this study has taught me many things about banking regulation and policy making and I am grateful to a very large number of people for their assistance Bob Glauber continues to be generous in discussing the challenges of change in the financial services industry
