Banks Peninsula:

A History of Christchurch Muslims Abdullah Drury, 2024-09-30 This book examines a significant part of New Zealand history through a critical analysis of the Muslim community in Christchurch a neglected but important aspect of wider New Zealand social and religious history Islam is one of the fastest growing religions in New Zealand and one of the least understood by the wider public However the historic reality demonstrates that the first Muslim settlers arrived within 15 years of the proclamation of the colony in 1841 and many have been living quietly in this country and contributing to society ever since Drury elucidates how New Zealand Muslims have proved it possible to integrate into a European society in the South Pacific whilst retaining an idiosyncratic sense of Islamic communal identity This book is a useful reference for scholars and educators curious to learn more about Muslims in New Zealand and about the Christchurch Mosque communities before the 2019 shootings

Intraplate Volcanism R. Wally Johnson, 1989-11-24 This study of the young volcanoes of eastern Australia and parts of New Zealand looks at rock types and formation and inclusions of the upper mantle and lower crustal rocks found in volcanic deposits It discusses the Earth's crust and the mantle beneath and the geological evolution in the area over the last 70-80 million years

Transactions and Proceedings of the New Zealand Institute New Zealand Institute, 1908 The proceedings or notices of the member institutes of the society form part of the section Proceedings in each volume lists of members are included in v 1 41 43 60 64

Nature and Farming David Norton FLS, Nick Reid, 2013-04-10 Conserving and enhancing native biodiversity on farms brings many benefits as well as providing many challenges Nature and Farming explains why it is important to sustain native plants and animals in agricultural landscapes and outlines the key issues in developing and implementing practical approaches to safeguarding native biodiversity in rural areas The book considers the range of ecological and agricultural issues that determine what native biodiversity occurs in farmland and how it can be secured Many inspiring case studies are presented where innovative approaches towards integrating biodiversity and farm management have been successful resulting in win-win outcomes for both nature and society In the integration and synthesis of these case studies lies the kernel of a new paradigm for nature conservation on farms Although the book focuses on biodiversity conservation on Australian and New Zealand farms the issues and approaches discussed are applicable to many other developed countries especially in Europe and North America
