Department of Printed Books, 1888 [Catalogue of Printed Books](#) British Museum, 1892 *The Strassmanns* W. Paul Strassmann, 2008-06 Across six generations and two hundred years this book tells the story of a German Jewish family who emigrated from Rawicz Poland first to Prussian Berlin and finally to America In Berlin they found success in politics medical science theatre and aviation and considered themselves German patriots With the catastrophe of the First World War and its aftermath they suffered rejection threats and persecution as their fellow citizens became unhinged by Nazism forcing Strassmanns into exile abroad where they again made their mark and rebuilt successful careers This book is populated by extraordinary characters such as Wolfgang the convicted revolutionary of 1848 who nevertheless led urban reform by Ernst who directed the only liberal anti Nazi resistance movement and by Antonie a celebrated actress and transatlantic sports pilot Strassmann highlights both the large scale and the very personal dramas of this period in world history The book is enhanced by many photographs offering a fascinating document of the fate of a remarkable family **British Museum** British Museum (London), 1883 **The Last Kaiser** Giles MacDonogh, 2003-04-25 Looks at the statesman who had a penchant for victory war and the belligerent aims of his staff even though he dubbed himself the Emperor of Peace detailing his life from his childhood to his involvement in World War I **Aus Meinem Leben, Volume 1 - Primary Source Edition** Louis Schneider, 2013-10 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book

treatises to psychological and biological genetic studies to a wide variety of popular cultural media over a long period of time The book offers a detailed examination of discursive and figurative representations of incest during five selected periods from 1600 to the present The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes without arguing for causal relations Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle Ages Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions Baroque discourse focused upon sexual relations among kin by marriage while Enlightenment and Romantic discussions worried the intimacy of siblings The first section of Part II deals with the six decades around 1900 during which European and American cultures obsessed about the sexuality of women Almost everyone concurred in the idea that mother made the family what it was that she configured the household kept the lines of kinship vibrant and stood at the threshold as stern gatekeeper and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons Another story line taken up in the section Intermezzo this one about the physical and mental consequences of inbreeding appeared after 1850 To what extent do close kin marriages pose risks for progeny At its center lay the incest problematic now restated Is avoidance of kin genetically programmed Do all cultures know about risks of consanguinity As for the twenty first century evolutionary and genetic assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I The shift from an endogamous to an exogamous alliance system centered on the nuclear family An historical anomaly this family form began to dissolve almost as soon as it came together and in the process shifted the focus of incest concerns to a new pairing father and daughter By the 1970s when the father daughter problematic swept all other considerations of incest aside that relationship had come to be modeled for the most part around power and its abusive potential As for incest its representations in the last three decades of the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family sexual abuse By the mid 1990s Western culture at least partly redirected its gaze away from father and daughter towards siblings especially towards brothers and sisters and the sexual boundaries and erotics of their relationships Correspondingly siblings became a model organism for psychotherapy evolutionary biology and the science of genetics

The People's Wars Mark Hewitson, 2017-02-09 How did ministers journalists academics artists and subjects in the German lands imagine war during the nineteenth century The Napoleonic Wars had been the bloodiest in Europe's history directly affecting millions of Germans yet their long term consequences on individuals and on politics are still poorly understood This study makes sense of contemporaries memories and histories of the Revolutionary and Napoleonic campaigns within a much wider context of press reportage of wars elsewhere in Europe and overseas debates

about military service and the reform of Germany's armies revolution and counter revolution and individuals experiences of violence and death in their everyday lives For the majority of the populations of the German states wars during an era of conscription were not merely a matter of history and memory rather they concerned subjects hopes fears and expectations of the future This is the second volume of Mark Hewitson's study of the violence of war in the German lands during the nineteenth and twentieth centuries It investigates the complex relationship between military conflicts and the violent acts of individual soldiers In particular it considers the contradictory impact of pacification in civilian life and exposure to increasingly destructive technologies of killing during war time This contradiction reached its nineteenth century apogee during the wars of unification leaving an ambiguous imprint on post war discussions of military conflict
