The MGB was a great British success story a product largely conceived designed and produced by a small team of dedicated people who genuinely cared about their work Of course the MGB came from a proud successful sports car tradition and the model it replaced the revolutionary aerodynamic MGA had been an unprecedented success so the new car had big shoes to fill Launching in 1962 and in production for eighteen years the MGB became one of the most successful sports cars the world has ever known This book describes how the MGB arose principally from the ideas of one man MG s Chief Engineer Syd Enever how it was designed and developed how it survived and thrived and how it became the classic car still highly regarded today There have been many previous books about the MGB and the related MGC and V8 variants but MGB The superlative MG reaches a new level of detail together seasoned with fresh insight David Knowles has been researching and writing about the MGB for more than thirty years Prepare to be surprised at some of the stories you will have never read before and new twists on some you possibly thought you knew well      **Motor Vehicle Safety Defect Recall Campaigns**

in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide
