## **Australia's Northwest Challenge:**

Ancient Animals, New Challenges Manuel Maldonado, Xavier Turon, Mikel A. Becerro, Maria Jesús Uriz, 2015-03-21 This book summarizes the latest advances in sponge science through a concise selection of studies presented at the VIII World Sponge Conference. The collection of articles reflects hot ongoing debates in molecular research such as the monophyletic versus paraphyletic nature of the sponge group or the new awareness on pros and cons of standard barcodes and other markers in sponge taxonomy and phylogeny. It also features articles showing how the new sequencing technologies reveal the functional and phylogenetic complexity of the microbial universe associated to sponge tissues. The ecological interactions of sponges, the effects of nutrients and pollutants, the variability in reproductive patterns, and the processes generating genotypic and phenotypic variability in sponge populations are covered in several contributions. Zoogeography, population structure, and dynamics are also approached with both traditional and molecular tools. The effect of anthropogenic disturbance on the natural environment finds its place in this volume with papers dealing with metal accumulation and the potential role of sponges as biomonitors. Biodiversity data from unexplored tropical and deep sea areas are presented. We hope readers will enjoy the selection of papers which we believe represent collectively a significant contribution to our current understanding of sponges. **Swimming with Crocodiles** Will Chaffey, 2011-07-01 In the tradition of *Into the Wild* here is the riveting story of a young man seeking his own truth and finding adventure in the awesome unforgiving power of nature. Will Chaffey is eighteen when he boards a plane in New York bound for Australia. Taking time off to work and travel, Will meets an enigmatic wanderer and herpetologist. Together they cross the inland desert to the tropical northwest coast home to the saltwater crocodile, a known man eater and a predator who has been hunting since the age of the dinosaurs. They devise a plan to explore the remote Prince Regent River, a trek so dangerous it had never been attempted by outsiders. Passing through harsh primeval country shadowed by their own exhaustion and physically worn down, they find themselves locked in a life and death struggle when their food runs out and unable to leave, they are stalked by a hungry crocodile. Filled with scenes of great natural beauty, *Swimming with Crocodiles* is at once the affecting account of a journey into adulthood and a hair-raising epic of survival. **Australia's North-west** Alex Kerr (M.A.), 1967.
