Authority Control In The Online Environment Considerations And Practices:

Authority Control in the Online Environment Barbara Tillett,1989-04-07 This valuable new book reviews past research on authority control offers new findings and documents important considerations for automating authority control Covering a wide range of important topics the contributors explore sharing authority records nationally and internationally perspectives on recent research and theoretical studies results of some new research with suggestions for future research and descriptions of the design of three different computerized authority control systems along with the impact of two such systems on library operations Authority Control in the Online Environment fills a vital gap in the literature by emphasizing name and title authority control instead of subject authority control which has already received considerable attention in recent literature This practical volume provides a great deal of inspiration to library administrators computer systems staff catalogers and other librarians involved with the automation of bibliographic control Library school students and professors desiring background information on authority control will also find this book enlightening

Describing Archival Materials Richard Smiraglia,2014-02-04 Here is an informative new volume that celebrates the increasing use and influence of the MARC format for Archives and Manuscript Control AMC As the format and its companion the online archival catalog gain acceptance among archivists several major issues evolve including the adoption and adaptation of standards for archival control data and the acceptance of archival control techniques for use in library collections This is an important volume for library cataloguers who in order to make use of the archival control techniques embodied in the AMC format must be familiar with basic techniques of archival collections management and archivists who might need basic instruction in relevant library cataloging techniques Describing Archival Materials presents the principles and techniques that describe the control of both textual and non textual materials Each chapter where appropriate contains examples of AMC records to illustrate various techniques In examining control of textual materials the authors outline the requisite details of archival description including the construction of finding aids and the representation of archival collections in catalogs according to the recognized standard APPM explain the concepts of intellectual responsibility and the basic concepts of choice and formulation of access points derived directly from AACR2 provide an archival translation of basic indexing concepts such as subject analysis and indexing depth all written within the context of LCSH explore the concepts of authority control of both names and subjects consider design issues that contributed to the construction of the format and focus on appropriate methods of content designation for archival descriptions discuss the development of archival information systems in particular focusing on archival management features and problems inherent in attempts to design systems that integrate archival and bibliographic records Three chapters also highlight archival control of nontextual materials visual images photographs and films sound recordings and cartographic materials
