## **Automatic Control 10th Triennial World Congress Of Ifac Vol 1:**

Proceedings of the ... Triennial World Congress of the International Federation of Automatic Control International Federation of Automatic Control,2003     Automatic Control Rolf Isermann,1988     *Model Reduction of Complex Dynamical Systems* Peter Benner,Tobias Breiten,Heike Faßbender,Michael Hinze,Tatjana Stykel,Ralf Zimmermann,2021-08-26 This contributed volume presents some of the latest research related to model order reduction of complex dynamical systems with a focus on time dependent problems Chapters are written by leading researchers and users of model order reduction techniques and are based on presentations given at the 2019 edition of the workshop series Model Reduction of Complex Dynamical Systems MODRED held at the University of Graz in Austria The topics considered can be divided into five categories system theoretic methods such as balanced truncation Hankel norm approximation and reduced basis methods data driven methods including Loewner matrix and pencil based approaches dynamic mode decomposition and kernel based methods surrogate modeling for design and optimization with special emphasis on control and data assimilation model reduction methods in applications such as control and network systems computational electromagnetics structural mechanics and fluid dynamics and model order reduction software packages and benchmarks This volume will be an ideal resource for graduate students and researchers in all areas of model reduction as well as those working in applied mathematics and theoretical informatics     **Subject Guide to Books in Print** ,2001     Plastics Process Analysis, Instrumentation, and Control Johannes Karl Fink,2021-03-30 This book focuses on plastics process analysis instrumentation for modern manufacturing in the plastics industry Process analysis is the starting point since plastics processing is different from processing of metals ceramics and other materials Plastics materials show unique behavior in terms of heat transfer fluid flow viscoelastic behavior and a dependence of the previous time temperature and shear history which determines how the material responds during processing and its end use Many of the manufacturing processes are continuous or cyclical in nature The systems are flow systems in which the process variables such as time temperature position melt and hydraulic pressure must be controlled to achieve a satisfactory product which is typically specified by critical dimensions and physical properties which vary with the processing conditions Instrumentation has to be selected so that it survives the harsh manufacturing environment of high pressures temperatures and shear rates and yet it has to have a fast response to measure the process dynamics At many times the measurements have to be in a non contact mode so as not to disturb the melt or the finished product Plastics resins are reactive systems The resins will degrade if the process conditions are not controlled Analysis of the process allows one to strategize how to minimize degradation and optimize end use properties
