Pastoral Australia Michael Pearson,Jane Lennon,2010-04-27 Pastoral Australia tells the story of the expansion of Australia s pastoral industry how it drove European settlement and involved Aboriginal people in the new settler society The rural life that once saw Australia ride on the sheep s back is no longer what defines us yet it is largely our history as a pastoral nation that has endured in heritage places and which is embedded in our self image as Australians The challenges of sustaining a pastoral industry in Australia make a compelling story of their own Developing livestock breeds able to prosper in the Australian environment was an ongoing challenge as was getting wool and meat to market Many stock routes wool stores abattoirs wharf facilities railways roads and river and ocean transport systems that were developed to link the pastoral interior with the urban and market infrastructure still survive Windmills fences homesteads shearing sheds bores stock yards travelling stock routes bush roads and railheads all changed the look of the country These features of our landscape form an important part of our heritage They are symbols of a pastoral Australia and of the foundations of our national identity which will endure long into the future

The Archaeology of Australia's History Graham Connah,1993-12-13 The material world of European settlement in Australia has been uncovered not only by historians but also by the work of archaeologists These archaeological inquiries have revealed new pictures of the public and private lives of Australians at home and at work This book previously published as a hardback under the title *Of the Hut I Buildded* now in paperback presents the insights gained from such investigations and makes them available to a wide audience Historical archaeology is broad ranging and this book discusses the first European towns including those settlements that failed the archaeological traces left by the convicts and archaeological evidence of the agricultural maritime industrial and manufacturing activities of early Australia Graham Connah also examines the evidence of earliest contact between Europeans and Aboriginal people

Exploring Place in the Australian Landscape David S. Jones,2022-08-30 This book offers an original framework on how to investigate understand and translate sense of place at a regional scale The book explores contemporary sense of place theory and practice drawing upon the Western District of Victoria in Australia being the Country of the White Cockatoo It offers a unique multi temporal and thematical analytical approach towards comprehending and mapping the values that underpin and determine strengths of human relationships and nuances to this landscape Included is a deep ethno ecological and cross cultural translation that takes the reader through both the Western understanding of sense of place as well as the Australian Aboriginal understanding of Country Both are different intellectual constructions of thoughts values and ideologies but which share numerous commonalities due to their archetypal meanings feelings and values transmitted to humans
