Bibliography on Land-Locked States Martin Ira Glassner,2023-12-28 Since the publication of the third edition of this bibliography 13 land locked territories have joined the United Nations and the ranks of independent States nine former Soviet socialist republics Slovakia and Macedonia and Ethiopia land locked throughout its long history except for the period 1952 1992 and Andorra land locked always but recognized as a sovereign State only in 1993 Thus by any reckoning there are now more than one third more land locked States in the world than there were only three years ago Some are already experiencing problems with transit across their more fortunate coastal neighbours and even other land locked neighbours and with their uses of the sea and it is likely that such problems will multiply and intensify before they are resolved This fourth edition contains a number of new features all intended to make it more useful as well as more complete and up to date than its predecessors The format has been improved in several ways there are more cross references and the subject index and table of contents have been expanded Bibliography on Land-locked States, Economic Development and International Law Martin Ira Glassner,2019-07-23 Now fully revised and expanded this is the only available bibliography on the subject of land lockedness and its effects on economic development Reflecting its expanded title this new edition includes not only updated information on the plight of land locked countries but also their current levels of economic development and their role in international law such as the International Law of the Sea Kyoto Protocol on Greenhouse Gas Emissions and international pipeline agreements The volume lists thousands of primary and secondary source materials for research

including books monographs journals governmental reports NGO publications and unpublished materials The book is truly international in scope with listings in 29 languages

Marine Affairs Bibliography Christian L. Wiktor,L.A. Foster,2024-12-02

Cases and Materials on the Law of the Sea Louis B. Sohn,John Noyes,2021-10-25 Cases and Materials on the Law of the Sea is a thoroughly up to date text that will be used both as a classroom course book and as a treatise and reference guide The text contains engaging teaching materials that systematically introduce law of the sea topics placing them in the context of important themes about the roles of international law and international legal process Historical materials of continuing importance appear alongside new materials that address such topics as maritime terrorism and port security the protection of underwater cultural heritage marine sanctuaries deep sea vent resources and the operation of the International Tribunal for the Law of the Sea and other new international organizations Published under the Transnational Publishers imprint

The Transit Regime for Landlocked States Kishor Uprety,2006 This publication examines the strengths and limits of existing international legislation relating to the free access of landlocked states to and from the sea including general and specific conventions as well as treaty regimes emanating from them It considers the economic issues involved given that many landlocked states are among the world s

poorest nations as well as ongoing international initiatives and developments *The Law of the Sea* Laura Pineschi, Tullio Treves, 2021-09-27 The United Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994 Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea New concepts such as the exclusive economic zone archipelagic waters transit passage through straits and the International Seabed Area are now fully recognized The fifteen member States of the European Union are a significant sample for analyzing the practice of States or at least that of the Western industrialized States as regards the law of the sea They include major and small maritime powers coastal and land locked States States with coasts on the Atlantic Ocean and States with coasts on semi enclosed seas such as the Baltic and the Mediterranean States with and without involvement in deep seabed mining and States with different interests as regards fisheries The fact that they all belong to the European Union is a very important common feature which amply justifies the choice made to study them together The book's aim is to give through essays prepared by well known specialists a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such The common positions of the member States and the results of their coordinated action also emerge from these essays The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument or at least as an instrument widely ratified by States of all continents and economic and political interests
