Bicycle The Image The Dream Red Bus:

Bicycle Nick Sanders, *Framing Production* Paul Rosen, 2002 A study of technological sociological and cultural changes in the British bicycle industry from the 1870s to the present

Women and the Machine Julie Wosk, 2003-04-01 An engaging study of the ways women and machines have been represented in art photography advertising and literature Arwen Palmer Mohun University of Delaware From sexist jokes about women drivers to such empowering icons as Amelia Earhart and Rosie the Riveter representations of the relationship between women and modern technology in popular culture have been both demeaning and celebratory Depictions of women as timid and fearful creatures baffled by machinery have alternated with images of them as being fully capable of technological mastery and control and of lending sex appeal to machines as products In *Women and the Machine* historian Julie Wosk maps the contradictory ways in which women's interactions with and understanding of machinery has been defined in Western popular culture since the dawn of the Industrial Revolution Drawing on both visual and literary sources Wosk illuminates popular gender stereotypes that have burdened women throughout modern history while underscoring their advances in what was long considered the domain of men Illustrated with more than 150 images *Women and the Machine* reveals women rejoicing in their new liberties and technical skill even as they confront society's ambivalence about these developments along with male fantasies and fears Engaging and entertaining Using illustrations cartoons and photographs from the past three centuries Wosk delineates shifts in social acceptance of women's relationship to technology her work is complex comprehensive and highly readable

Publishers Weekly Art historian Wosk analyzes the overt and covert messages in depictions of women and machines in an array of fiction and more impressively in some 150 visual images Booklist

Cycling Peter Cox, 2019-03-15 *Cycling A Sociology of V lomobility* explores cycling as a sociological phenomenon Drawing on extensive ethnographic fieldwork it considers the interaction of materials competencies and meanings that comprise a variety of cycling practices What might appear at first to be self evident actions are shown to be constructed through the interplay of numerous social and political forces Using a theoretical framework from mobilities studies its central themes respond to the question of what it is about cycling that provokes so much interest and passion both positive and negative Individual chapters consider how cycling has appeared as theme and illustration in social theory as well as the legacies of these theorizations The book expands on the image of cycling practices as the product of an assemblage of technology rider and environment Riding spaces as material technologies are found to be as important as the machinery of the cycle and a distinction is made between routes and rides to help interpret aspects of journey making Ideas of both affordance and script are used to explore how elements interact in performance to create sensory and experiential scapes Consideration is also given to the changing identities of cycling practices in historical and geographical perspective The book adds to existing research by extending the theorization of cycling mobilities It engages with both current and past debates on the place of cycling in mobility systems and the problems
