As such, it becomes imperative to research and report recent advancements in computational intelligence as it applies to communication networks. The *Handbook of Research on Recent Developments in Intelligent Communication Application* is a pivotal reference source for the latest developments on emerging data communication applications. *Field-Programmable Logic and Applications: The Roadmap to Reconfigurable Computing* Reiner W. Hartenstein, Herbert Grünbacher, 2003-06-29 This book is the proceedings volume of the 10th International Conference on Field Programmable Logic and its Applications (FPL) held August 27-30, 2000 in Villach, Austria, which covered areas like reconfigurable logic (RL), reconfigurable computing (RC), and its applications, and all other aspects. Its subtitle, *The Roadmap to Reconfigurable Computing*, reminds us that we are currently witnessing the runaway of a breakthrough. The annual FPL series is the eldest international conference in the world covering configware and all its aspects. It was founded in 1991 at Oxford University, UK, and is 2 years older than its two most important competitors, usually taking place at Monterey and Napa. FPL has been held at Oxford, Vienna, Prague, Darmstadt, London, Tallinn, and Glasgow; also see <http://www.fpl.uni-kl.de>. FPL: The New Case for Reconfigurable Platforms Converging Media Indicated by palmtops, smart mobile phones, many other portables, and consumer electronics media such as voice, sound, video, TV, wireless, cable, telephone, and Internet continue to converge. This creates new opportunities and even necessities for reconfigurable platform usage. The new converged media require high-volume, flexible, multi-purpose, multi-standard, low-power products adaptable to support evolving standards, emerging new standards, field upgrades, bug fixes, and to meet the needs of a growing number of different kinds of services offered to zillions of individual subscribers preferring different media mixes.

*Message Handling Systems and Application Layer Communication Protocols* Pietro Schicker, Einar Stefferud, 1991 Protocols related to message handling systems and application layer communication protocols in general will continue to enjoy rapid development in the near future. Demonstrations of data communication between different vendors' application systems have become commonplace. A tidal wave of OSI application products and services appears to be cresting now with the promise of a flood throughout the 1990s. The research papers in this book look at various aspects of this rush of development. The role of security be it for
