ANALYTICAL PHILOSOPHY OF HISTORY

Paul A. Roth

Introduction

Interestingly and perhaps ironically, the challenge of determining both the philosophical content and the specific philosophers falling under a label such as “analytical philosophy of history” arises only when contemplating how this label might apply retrospectively, i.e. historically. For prior to the publication in 1963 of Arthur Danto’s classic book with this title,¹ references abound in the philosophical literature to “philosophical analysis” but not to “analytical philosophy of history.”

The canonical starting point (only retrospectively identified as such) for using this label has become C.G. Hempel’s “The Function of General Laws in History.”² Yet Hempel would not have identified as an analytical philosopher, much less an analytical philosopher of history. He was a logical positivist, and the term “analytical philosophy” had as of 1942 no real currency. But Hempel probably more than anyone in the 20th century shaped philosophical discussions of scientific explanation, itself mostly a 20th century creation.³ Hempel’s article achieves wide recognition early on by virtue of being included in an influential anthology.⁴ But one finds no entry in that anthology for “analytical philosophy of history” or even “analytical philosophy.”

Taking Hempel 1942 as a beginning gains some further measure of plausibility because of how Thomas Kuhn’s 1962 work comes to mark an endpoint of that way of thinking about explanation as initiated by Hempel.⁵ That is to say, the subject that comes to be known as “analytical philosophy of history,” as well as the thinkers and works so classified, emerge retrospectively as a distinct subfield that emerges from logical positivism and in light of Hempel’s field-defining work on scientific explanation.⁶ It should also be kept in mind that controversies regarding what epistemically legitimates claims to having provided a good historical explanation both perpetuate and replay debates on the European scene since the second part of the 19th century. In addition, the political context fostered by the 1930s due to the rise of fascism in Europe and continuing through the Stalin era and the Cold War lent both an edge and an urgency to debates about the legitimacy of historical explanation.⁷ The Hempelian theory was early on known as the Popper-Hempel theory, and it surely is no accident that two European refugees sought a politically neutral language by which to evaluate claims made on behalf of one or another political ideology.⁸ So, while beyond the scope of this chapter, social and political
