Dragon Bone Hill An Ice Age Saga Of Homo Erectus:

Dragon Bone Hill Noel T. Boaz, Russell L. Ciochon, 2004-02-16 Peking Man a cave man once thought a great hunter who had first tamed fire actually was a composite of the gnawed remains of some fifty women children and men unfortunate enough to have been the prey of the giant cave hyena Researching the famous fossil site of Dragon Bone Hill in China scientists Noel T Boaz and Russell L Ciochon retell the story of the cave s unique species of early human Homo erectus Boaz and Ciochon take readers on a gripping scientific odyssey New evidence shows that Homo erectus was an opportunist who rode a tide of environmental change out Africa and into Eurasia puddle jumping from one gene pool to the next Armed with a shaky hold on fire and some sharp rocks Homo erectus incredibly survived for over 1 5 million years much longer than our own species Homo sapiens has been on Earth Tell tale marks on fossil bones show that the lives of these early humans were brutal ruled by hunger and who could strike the hardest blow yet there are fleeting glimpses of human compassion as well The small brain of Homo erectus and its strangely unchanging culture indicate that the species could not talk Part of that primitive culture included ritualized aggression to which the extremely thick skulls of Homo erectus bear mute witness Both a vivid recreation of the unimagined way of life of a prehistoric species so similar yet so unlike us and a fascinating exposition of how modern multidisciplinary research can test hypotheses in human evolution Dragon Bone Hill is science writing at its best

The People's Peking Man Sigrid Schmalzer, 2024-05-31 In the 1920s an international team of scientists and miners unearthed the richest evidence of human evolution the world had ever seen Peking Man After the communist revolution of 1949 Peking Man became a prominent figure in the movement to bring science to the people In a new state with twin goals of crushing superstition and establishing

a socialist society the story of human evolution was the first lesson in Marxist philosophy offered to the masses At the same time even Mao's populist commitment to mass participation in science failed to account for the power of popular culture represented most strikingly in legends about the Bigfoot like Wild Man to reshape ideas about human nature The People's Peking Man is a skilled social history of twentieth century Chinese paleoanthropology and a compelling cultural and at times comparative history of assumptions and debates about what it means to be human By focusing on issues that push against the boundaries of science and politics The People's Peking Man offers an innovative approach to modern Chinese history and the history of science

Encyclopedia of Evolution Stanley A. Rice, 2009 Evolutionary science is not only one of the greatest breakthroughs of modern science but also one of the most controversial Perhaps more than any other scientific area evolutionary science has caused us all to question what we are where we came from and how we relate to the rest of the universe Encyclopedia of Evolution contains more than 200 entries that span modern evolutionary science and the history of its development This comprehensive volume clarifies many common misconceptions about evolution For example many people have grown up being told that the fossil record does not demonstrate an evolutionary pattern and that there are many missing links In fact most of these missing links have been found and their modern representatives are often still alive today The biographical entries represent evolutionary scientists within the United States who have had and continue to have a major impact on the broad outline of evolutionary science The biographies chosen reflect the viewpoints of scientists working within the United States Five essays that explore interesting questions resulting from studies in evolutionary science are included as well The appendix consists of a summary of Charles Darwin's Origin of Species which is widely considered to be the foundational work of evolutionary science and one of the most important books in human history The five essays include How much do genes control human behavior What are the ghosts of evolution Can an evolutionary scientist be religious Why do humans die Are humans alone in the universe

[The Peking Man is Missing](#) Claire Taschdjian, 2008 In the 1920s on a hill near Peking now Beijing a team of scientists discovered a huge cache of human bones some more than half a million years old Collectively dubbed Peking Man they were one of the most important finds in the history of paleontology And in 1941 in the chaos of World War II they disappeared No one knows what happened but there are plenty of theories many with political implications Claire Taschdjian's speculation as to what might have become of the priceless fossils could represent just another theory but for one intriguing fact Claire Taschdjian was one of the last people in the world known to have seen Peking Man With newly commissioned material on the true story of the Peking Man
