Drawing from Nature George Barnard, 1865 Drawing from Nature Gerhard Gollwitzer, 1970 **Drawing from the Book of Nature** Dennis Klocek, 1990 When students are given fixed and finalized abstractions from the beginning they do not have to use their own inner forces to overcome the resistance of the world to arrive at truth or to create beauty The result is that their inner pictures are devoid of life To arrive at a truth or to create beauty that reflects the order and harmony of the Creator we must always begin humbly in ignorance and ugliness By striving out of ignorance and ugliness toward the true and beautiful both scientists and artists can bring new creative forces into the world Neither memorizing data nor copying a beautiful drawing engages the true imagination of students as it is by drawing a flower from life It is precisely this lack of an active striving inner creativity that can result in the frequently overwhelming feelings of anxiety and alienation experienced by so many people today As a counterbalance education must in all areas of knowledge increasingly focus on the personal creation of what through its beauty speaks truth and through its truth radiates beauty Drawing from the Book of Nature is about both drawing and the natural world of plants and animals It is a valuable resource for teachers students and anyone who wants to develop a capacity for artistic observation of natural phenomena Dennis Klocek provides a refreshing combination of depth and clarity offering a wealth of insight into the lives that constitute living nature The text is
