

The procedure in Illustration No. 4 is a diagram of the action. The basic design elements involved here is the fundamental concept of opposites, the most basic of design principles. The use of opposites is a tool that not only creates visual interest, but each helps to clarify the other. The follow-up called this page "Visual Poise."

Illustration No. 4

Illustration No. 1

The follow-up that you look for is that we look for and use as much as help or understand and describe the action. As the arm, generally, goes a little bit out of control, as defined by the central axis of the arm. The most useful looking elements are the ends of the bones at the various joints.

If you look back at the other. The composition of the pose of the arm creates a very general sense of showing the direction of the arm. Illustration No. 1 shows you how the hand is turned. The end of the hand along with the opposite of the forearm create two clear points for you to use in your drawing. When the arm is straight, these points make a straight line. When you bend your arm, the tip of the elbow drops. The straight line becomes the end of the radius of the forearm. The axis created by the line between the wrist and elbow is the center of the radius or spine.

Drawing Is Fun Leo Buckley,2010-09-22 As a working artist Leo Buckley was invited to talk to the sixth grade of a local primary school The resulting question and answer session revealed an enormous appetite of the students for some simple rules to enable them to improve their drawing abilities They had been unable to find this information at their level in any book in the bookshops saying that the only available books either assumed knowledge which they did not have or else treated the topics so briefly as to be scarcely helpful As result Leo returned with a few instructive talks on some of the basic principles of drawing Using feedback from the pupils and teachers the talks were developed into a fairly comprehensive series on the subject which soon become in great demand by other schools For many years Leo has presented the talks to schools covering a wide variety of schools and pupils and eventually including adult classes Throughout this extended period the lessons were modified adjusted in contents and rearranged into the most logical sequence to better suit the need of this widening range of students At the frequent request of teachers and students of all age groups Leo examined the possibility of compiling a book which would follow the successful pattern of his lectures even to the extent of displaying the illustrations and text on opposite pages as in a chalk and talk classroom environment This innovative and easy to follow method simplified the presentation enormously and he found that the lectures almost immediately fell into book form
