Giuseppe De Chiara, Davide Sivoletta,2025-10-01 This book is a fast paced account supported by striking compelling renderings of how spaceflight has been forever changed since NASA heralded the Commercial Orbital Transportation Services COTS program on January 18th 2006 Spaceflight was once a clunky affair ruled by inefficient cost plus models that gravely hampered the rapid pace of innovation while extorting a tremendous ransom to the taxpayers In a single volume you will embark on a thrilling journey of how major and lesser known launcher and spacecraft manufacturers have devoted their resources to bring forward a vision of profit by rapid innovation offering transportation services from LEO through cis lunar space and beyond Earth s sphere of influence This book recognizes NASA s COTS program as a pivot point in the history of the space agency and worldwide space industry and charts two story arcs before COTS BC and after COTS AC The reader will understand how much the space industry has benefitted from the introduction of COTS in the pursuit of making humankind a spacefaring civilization This book will feature numerous stunning original illustrations cross sections close up views and many more meticulously crafted by renowned space artist Giuseppe De Chiara As the saying goes a picture is worth a thousand words and these stunning images will capture the reader offering an exclusive intellectual experience

Space Fostering African Societies Annette Froehlich,2021-02-22 This peer reviewed book provides detailed insights into how space and its applications are and can be used to support the development of the full range and diversity of African societies as encapsulated in the African Union s Agenda 2063 Following on from Part 1 which was highly acclaimed by the space community it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa but covers an

even more extensive array of relevant and timely topics addressing all facets of African development. It demonstrates that while there have been significant achievements in recent years in terms of economic and social development which have lifted many of Africa's people out of poverty, there is still a great deal that needs to be done to fulfill the basic needs of Africa's citizens and afford them the dignity they deserve. To this end, space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future, but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in helping Africa achieve its developmental aspirations, the book will appeal to both students and professionals in fields such as space studies, international relations, governance, and social and rural development.
