

THE GIVER

The Giver is a 1993 soft science fiction novel by Lois Lowry. It is set in a future society which is at first presented as a utopian society and gradually appears more and more dystopian. The novel follows a boy named Jonas through the twelfth year of his life. The society has eliminated pain and strife by converting to "Sameness", a plan which has also eradicated emotional depth from their lives. Jonas is selected to inherit the position of "Receiver of Memory," the person who stores all the memories of the time before Sameness, in case they are ever needed to aid in decisions that others lack the experience to make. When Jonas meets the Giver, he is confused in many ways. The Giver is also able to break some rules, such as turning off the speaker and locking his door. As Jonas receives the memories from the previous receiver—the "Giver"—he discovers the power of knowledge. The people in his community are happy because they don't know of a better life but the knowledge of what they are missing out on could create chaos. He faces a dilemma: Should he stay with the community, his family living a shallow life without love, color, music and knowledge or should he run away to where he can live a full life?

The novel forms a loose trilogy with Gathering Blue (2000) and Messenger (2004), two other books set in the same future era.

The Natural Laws of Plot Yoon Sun Lee, 2022-10-11 Is plot a line an arc or a shape None of these Rather than thinking of plot as a sequence of events or actions put into place solely through human agency against the backdrop of setting this book questions why we should distinguish between plot and setting and indeed whether we can make such a distinction After all plot Yoon Sun Lee contends cannot be disentangled from the material setting in which it takes place In *The Natural Laws of Plot* Lee connects the history of the novel and the history of science to show how plot in the realist novel is given shape by the characteristics of the physical world and how in turn plot serves as the avenue through which the realist novel participates in the same lines of inquiry about the world as pursued by the natural and physical sciences Lee argues that the novel emerges and evolves in tandem with the development of scientific practices and concepts in eighteenth and nineteenth century Europe to investigate the idea of a unified and objective world Drawing on readings from Defoe Austen Scott and many others Lee demonstrates how bodies human and non human behave according to laws that are built into worlds by plot and how they are subject to causes and consequences that can occur independently of individual action social forces or metaphysical destiny This interest in representing and exploring how things happen sets the novel apart from other literary genres and makes the history of science integral to the understanding of the history and theory of the novel and of narrative Plot Lee shows us is immersive and powerful because it satisfies our wish to know how things happen in a coherent objective and possibly real world
