Gas Replenishment Techniques for Use in High-altitude, Long-duration Scientific Balloon Flights Andrew S. Carten (Jr.), Charles F. Sindt, 1979 This report covers the theoretical advantages and practical ramifications of a proposed new technique for compensating for the daily loss of lift γ experienced by long duration high altitude scientific balloon flights This technique Gas Replenishment would transfer stored helium from an onboard dewar to the balloon to replace gas lost due to temperature excursions It would be a direct substitute for systems presently in use which drop ballast that is reduce system gross weight to compensate for loss of lift With gas replenishment lift is restored directly with only a small change in system gross weight A short summary of zero pressure balloon flight theory is given at the start to lead into the explanation of conventional ballast practices and computations The ballast equations are then modified to apply to the gas replenishment technique Calculations for typical constant γ flights are summarized for each method of loss compensation and the clear superiority of gas replenishment is demonstrated in the areas of gross system weight of launch usable payload weight and anticipated flight duration Basic equations are then developed for a more complicated model of the gas replenishment system in which the value of γ varies from day to day Computations using these formulas are summarized in tabular form The final section of the report is given over to the design problems associated with the type of dewar and heat exchange equipment needed to implement the gas replenishment concept Author *Balloon Flying Handbook (Federal Aviation Administration)* Federal Aviation Administration, 2012-07-01 A thrilling blend of adventure and science the art of flying hot air balloons has never been easier to enjoy In this newly revised edition of the Federal Aviation Administration s Balloon Flying Handbook pilots of any skill level will find an easy to understand overview of balloon aeronautics along with pointers and tips for safety With over 200 full
