Showing Time: Continuous Pictorial Narrative and the Adam and Eve Story Laura Messina-Argenton, Tiziano Agostini, Tamara Prest, Ian F. Versteegen, 2023-02-14 How does a visual artist manage to narrate a story which has a sequential and therefore temporal progression using a static medium consisting solely of spatial sign elements and what is more in a single image This is the question on which this work is based posed by its designer Alberto Argenton to whose memory it is dedicated The first explanation usually given by scholars in the field is that the artist solves the problem by depicting the same character in a number of scenes thus giving indirect evidence of events taking place at different times This book shows that artists in addition to the repetition of characters devise other spatial perceptual representational

strategies for organising the episodes that constitute a story and therefore showing time Resorting to the psychology of art of a Gestalt matrix the book offers researchers graduates advanced undergraduates and professionals a description of a large continuous pictorial narrative repertoire 1000 works and an in depth analysis of the perceptual representational strategies employed by artists from the 6th to the 17th century in a group of 100 works narrating the story of Adam and Eve
