Communication And Cooperation In Agent Systems A Pragmatic Theory:

   Communication and Cooperation in Agent Systems Afsaneh Haddadi,1996-04-17 This book is devoted to the design and analysis of techniques enabling intelligent and dynamic cooperation and communication among agents in a distributed environment A flexible theoretical formalism is developed in detail and it is demonstrated how this approach can be used for the design of agent architectures in practice The formal part of this work is based on a variant of the BDI logic introduced by Georgeff and Rao This book for the first time outlines this formalism in some depth The most important practical benefit provided is the concept of cooperation protocols allowing the representation of various methods of cooperation and possible patterns of dialogue   **Communication and Cooperation in Agent Systems** Afsaneh Haddadi,2014-09-01   **The Design of Intelligent Agents** Jörg P. Müller,1996-11-27 This monograph presents a comprehensive state of the art survey on approaches to the design of intelligent agents On the theoretical side the author identifies a set of general requirements for autonomous interacting agents and provides an essential step towards understanding the principles of intelligent agents On the practical side the novel agent architecture InteRRaP is introduced the detailed description and evaluation of this architecture is an ideal guideline and case study for software engineers or researchers faced with the task of building an agent system The book uniquely bridges the gap between theory and practice it addresses active and novice researchers as well as practitioners interested in applicable agent technology   Agent-Based Manufacturing S.M. Deen,2013-04-17 Low volume high variety products like personalized cars or customized engines will be the key issues for manufacturing in the 21st century The necessary control technology is based on the concept of holons which are the units of production and behave as autonomous and cooperative agents providing flexibility adaptability agility and dynamic reconfigurability This book presents the latest research results in agent based manufacturing as carried out by researchers in academia and industry within the international Holonic Manufacturing Systems project As this project was driven by industry the results presented here are of vital interest not just to researchers in agent technologies or distributed artificial intelligence but also to engineers and professionals in industry who have to respond to rapid changes and new demands in production
