Introduction to Healthcare for Arabic-speaking Interpreters and Translators Ineke H.M. Crezee, Nawar Gailani, Anna N. Gailani, 2016-12-08 Arabic is a language of substantial cultural and religious importance. It is spoken by about 300 million people predominantly in the 22 countries of the Arab world as well as in several other regions where the Arab diaspora has settled. Arabic is also the language of Islam and underpins the religious practice of about 1.5 billion Muslims worldwide. In view of the above, the authors thought it important to create an easily accessible handbook for interpreters, translators, educators, and other practitioners working between Arabic and English in healthcare settings. *Introduction to Healthcare for Arabic-speaking Interpreters and Translators* follows the seminal publication *Introduction to Healthcare for Interpreters and Translators* Crezee 2013 and has been supplemented with Arabic glossaries and comments about health communication between Anglophones and Arabic speakers. This practical resource book will help inform interpreters and translators about healthcare settings, anatomy, physiology, medical terminology, and frequently encountered conditions, diagnostic tests, and treatment options. Arabic is divided into two categories: formal Classical Standard or literary Arabic and local dialects colloquial Arabic. Formal Arabic is the official language of all Arab countries. In each of these, there are regional dialects which color formal Arabic and add character to a poetic and expressive language. Poetic nature is found in many daily expressions and not only in Arabic literature. For example, "Good morning" in Arabic is "Sabah al khair" which in essence wishes others a morning of goodness, and the pan-Arab greeting "Salam Alaykum" which literally means "may peace be upon you." Dialects once existed principally in spoken form but these days they are increasingly used in writing in social media and its paraphernalia, mobile phones, tablets, etc. In this book, formal Arabic is used in the glossaries simply because it is the recognized language of literacy across the Arabic-speaking world.

Transcultural Medicine B. Qureshi, 2012-12-06 WHY WE MUST PRACTISE TRANSCULTURAL MEDICINE Health professionals and GPs should concern themselves with ethnicity, religion, and culture as much as with the age, sex, and social class of their patients. Transcultural medicine is the knowledge of medical and communication encounters between a doctor or health worker of one ethnic group and a patient of another. It embraces the physical, psychological, and social aspects of care as well as the scientific aspects of culture, religion, and ethnicity without getting involved in the politics of segregation or integration. English general practitioners and health professionals tend to regard everyone as English and to assume that all patients have similar needs. Would that it were as simple as that! For economic reasons based on supply and demand, the mass migration of working populations from the new Commonwealth countries along with their dependent relatives, including their parents to Britain, took place during one decade, the 1960s. Broadly speaking, the workers were in their thirties and forties, and their dependent parents were in their fifties and sixties. All these will, of course, be 30 years older in the 1990s.

The American Humanities Index Stephen H. Goode,1978 *Envisioning PMO & Project Management Through A Juggler's Eye: Part-1* Abhishek Mishra,2020-12-27 The Nonpareil of the Project Managers is in the way they express through their communication planning coordination persuasiveness and attitude The Project managers are the Jugglers because Jugglers can adroitly manage multiple activities simultaneously So as the Project Managers are they are the best strategist in this entire universe apart from this the planning and coordination of a Project Manager is always class apart The problem with Project Managers and the Project Management Office role is that they are always treated as overhead and always underrated To summarize they are the underdog who can hold the flag until the fort s last brick but they have never been treated similarly I have always been trying to change the leaders mindset and thoughts through my articles so far This book will run through all those articles and help you feel my thoughts experience knowledge and perspective on Project Management and PMO If thoughts are nurtured with the right attitude and expressed concisely it will have immense power to change the process and the entire world By following this principle I have been expressing my thoughts and ideas similarly and I could only see the difference in people s talk Still I am sure one day things change on the ground of reality whereas things will change at the forefront not only in people s conversation I hope this book will nurture your thoughts and get you the exact feel of my thoughts Lastly I hope this book will help the aspiring PM s and PMO s in the right way to groom them and present them in a way where you will not become a Project manager but you can also become a front runner for a future great leader you can become an influencer
