Drawing Houses:

Children's Drawings Martin Krampen, 1991-03-31 This book is dedicated to all those who love children and their wonderful often surprising drawings This means it addresses all those interested in their developing capacity to produce iconic signs parents teachers child psychologists artists architects since building drawings are treated here and semioticians at large to name but a few potential readers Because of the broad audience I tried to keep scientific jargon to a minimum Whenever this was unavoidable I tried to explain the terms in such a way that even beginners in psychology could understand my arguments I received the first impulse to think about a book like this from the International Year of the Child declared by the UN in 1979 In a first phase of the project I obtained drawings of the six different building types treated in this book from more than 100 children aged 3-12 years in Turkey during a stay there as part of the faculty of Architecture of the Karadeniz Technical University in Trabzon under the auspices of the UN ESCO UNDP program TUR 75 012 My special thanks go to Dr Erdem Aksoy then president of the university and Dr Ozgontil Aksoy then dean of the faculty of Architecture and Civil Engineering for their encouragement to carry out the project I would also like to thank Dr Kutzal Oztirk Sevinc Ertirk Ali Ozbilen Hasan Saltik together with all the teachers in nursery and elementary schools in and around Trabzon who helped to collect the drawings
