When multiple forces act on an object, they combine to produce a net force, which determines whether the object speeds up, slows down, or changes direction. Understanding how forces act together is essential to explaining various observations from a physics world, such as a ball's trajectory or a car's acceleration.</p> <p>Newton's second law of motion states that the acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. This means that if the net force increases, the acceleration increases proportionally, and if the mass increases, the acceleration decreases. This relationship is crucial for understanding many physical phenomena, from a ball's trajectory to a car's acceleration.</p> <p>Newton's second law also explains the difficulty of stopping a heavy object with a small weight. A small weight exerts a small force, which is not enough to overcome the object's inertia. To stop a heavy object, a larger force is needed. This is why it is difficult to stop a heavy object with a small weight. The same principle applies to starting a heavy object in motion. A small force is not enough to overcome the object's inertia. To start a heavy object moving, a larger force is needed. This is why it is difficult to start a heavy object moving with a small force.</p> </div> <p>Answer the correct answer for each question.</p> <ol style="list-style-type: none"> Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration Which of the following is NOT a vector quantity? <ol style="list-style-type: none"> Force Mass Velocity Acceleration <div style="text-align: right;">  </div>
