A HISTORY OF GEORGIA, FROM ITS FIRST DISCOVERY BY EUROPEANS TO THE ADOPTION OF THE PRESENT CONSTITUTION IN MDCCXCVIII. REV. WILLIAM BACON STEVENS. M.D.,1847

A Popular History of the United States from the first discovery of the Western Hemisphere by the Northmen, to the end of the first century of the Union of the States William Cullen Bryant,Sydney Howard Gay,1879 History of New Hampshire, from Its First Discovery to the Year 1830 Edwin David Sanborn,1875 *A Pioneer Outline History of Northwestern Pennsylvania* William James McKnight,1905 Sheffield Castle John Moreland,Dawn Hadley,2020-09-02 Sheffield Castle presents an original perspective on an urban castle resurrecting from museum archives a building that once made Sheffield a nexus of power in medieval England its lords playing important roles in local national and international affairs Although largely demolished at the end of the English Civil War the castle has left an enduring physical and civic legacy and continues to exert a powerful sway over the present townscape and future development of Sheffield In this volume we rediscover the medieval castle explore its afterlife and discuss its legacy for the regeneration of Sheffield into the twenty first century The authors bring to publication for the first time all the major excavations on the site present the first modern study of artefacts excavated in the mid twentieth century and situate both in the context of the published and unpublished documentary record They also tell the stories of those responsible for re discovering the castle the circumstances in which they were working their archaeological methods and the scholarly and political influences that shaped their narratives In setting the study within the context of urban regeneration Sheffield Castle differs from most publications of medieval castles This regeneration narrative is both historical addressing the ways in which successive building campaigns have encountered the castle remains and current as the future of the site is under active discussion following the demolition of the market hall built on the site in the 1960s The book explores how the former existence of the castle and the landscape in which it sat including its deer park have shaped the development of the Steel City We see that the untapped heritage of the site has considerable value for the

regeneration of what may now be one of the most deprived areas of Sheffield but was once at its social political and cultural heart

From the Temple to the Castle Lee Morrissey, 1999 Visiting Britain in the mid 18th century Andre Rouquet wrote that in England more than in any other country every man would fain be his own architect Not surprisingly then several of the most important 18th century British authors were also practicing architects John Vanbrugh a playwright designed Blenheim Palace the poet Alexander Pope offered architectural drawings for redesigning the houses of friends and Horace Walpole claimed that the home he renovated Strawberry Hill inspired his Novel The Castle of Otranto The work of John Milton and Thomas Gray also exhibits an abiding interest in architecture By examining the connections between literature and architecture in the work of these writers and by viewing architecture in literary terms Lee Morissey traces a narrative of cultural change in the Augustan age and beyond A literary scholar with a strong background in architectural theory and practice Morissey examines architectural references made by these authors and architectural publications familiar to them Each chapter establishes a connection with architecture in the careers of an author and then describes how a principal text Paradise Lost The Provok d Wife An Essay on Man Elegy Written in a Country Churchyard and The Castle of Otranto focuses the literary and historical issues of the period in architectural terms While some 20th century architectural theorists have worried that treating architecture in literary terms robs it of its social function Morrissey argues that architecture can be a language and still participate in political and social contexts because language itself is political and social The fruit of his argument is a unique intellectual history of late 17th and early 18th century Britain of use to scholars of architectural history and landscape architecture as well as of literature
