Classes Strata And Power:

Classes, Strata and Power (RLE Social Theory) Włodzimierz Wesolowski, 2014-08-21 Professor Wesolowski presents a detailed study of Marx's theory of class structure and compares it with non-Marxist theories of social stratification in particular the functionalist theory of stratification and the theory of power elite. He is also concerned to develop and extend the Marxist approach to the study of class structure and social stratification in a socialist society. The book begins with a thorough and original reconstruction of Marx's theory of class domination in a capitalist society and goes on to show that contemporary non-Marxist theories of power elites complement rather than contradict Marx's concept of class domination. The author examines in detail the functionalist theory of stratification but rejects it, preferring the Marxist approach. Finally, though he demonstrates the complementary nature of the two approaches to the study of class structure by expounding a comprehensive paradigm for empirical research based on Marxist theory but including some elements of contemporary stratification theories as well.

Stratification and Power John Scott, 2014-04-03 This volume presents a systematic discussion of the leading theoretical approaches to social stratification. It is both an accessible overview and a distinctive contribution to the analysis of class status and power. John Scott argues that Max Weber's conceptual framework reconstructed and enlarged provides the basis for integrating what have been considered up to now as divergent approaches to stratification studies: Marxist theories of class and economic division; normative functionalist theories of status and cultural division; and elitist theories of command and authoritarian division. All find their place in the proposed framework. Each theoretical approach is illustrated through empirical investigations undertaken by writers associated with them. Recent work by Dahrendorf, Wright and Goldthorpe is also examined and it is shown how their arguments contribute to a theoretical synthesis in the analysis of stratification. *Stratification and Power* will be much appreciated by students and academics alike in the social sciences. The clarity of its style and the significance of its contribution have made it a leading text in its field.
