Comprehensive Security:

Comprehensive Security James C. Hsiung, 2004 Security studies in the twenty first century entail a paradigm shift from the traditional concerns of national defense military security to other dimensions namely the economic environmental and human security of nations After September 11 the traditional notion of security takes on an anti terrorist connotation giving a new salience to homeland security This study is a coherent explication of comprehensive security in the above named dimensions *Comprehensive Security in Asia*, 2000-04-27 The term comprehensive security was first used by the late Japanese prime minister Ohira but the concept as such can be traced back to Japanese thinking on security during the fifties Its meaning goes far beyond requirements of military defence against a particular enemy and stresses the need to take into account other aspects vital to national stability food energy environment communication and social security While not denying the importance of military security it explicitly encompasses a wide range of other aspects the search for environmental security for instance which requires cooperation with other countries including hypothetical enemies The concept stresses the need for confidence building methods as a requirement for its attainment and pertains to issues such as preventive diplomacy energy security second order cybernetics greater transparency of international financial markets as means to enhance overall stability It is a notion that goes beyond simplifications such as us and them Since the word has been first coined in Japan it has caught on in other Asian countries as well It has become clear that the concept is particularly suited for a continent where large and powerful countries such as China Korea Japan and Indonesia are unlikely to enter into close cooperation along the model of the European Union In short in this volume a team of scholars from Asia Europe and the United States provide clear analyses of issues vital to Asian politics an important contribution to one of the key issues of contemporary Asian politics **World Review**, 1982 Comprehensive Accounting Corp. V. Rudell, 1984 **Developing a Comprehensive Security Program** Bob Hayes, Kathleen Kotwica, Elizabeth Lancaster, 2014-02-14 Developing a Comprehensive Security Program answers the question common among security managers What is a model security program and how does our program compare to it In this seven minute Proven Practices presentation narrator Elizabeth Lancaster outlines the baseline elements of a security program which have been defined by experienced Security Executive Council members and research This presentation is not sector specific meaning it s applicable for all organizations and industries In addition to the baseline security program elements Lancaster also discusses business aligned program elements program characteristics a program maturity model and the skills and knowledge the security department needs to possess Developing a Comprehensive Security Program may be used as a benchmark for existing programs and to educate senior management It also provides a general understanding of the security function as it currently exists Developing a Comprehensive Security Program is a part of Elsevier s Security Executive Council Risk Management Portfolio a collection of real world solutions and how to guidelines that equip executives practitioners and educators with proven information for successful security and risk

management programs The seven minute visual PowerPoint presentation with audio narration format is excellent for group learning Information is drawn from the many years of collective knowledge and experience of the Security Executive Council community Identifies program characteristics and the knowledge areas and skills security leaders should possess
