Wang,2012-12-06 To understand what we know and be aware of what is to be known is a necessary approach to treating CAD CAM issues The challenge for all of us interested in CAD CAM and engineering data handling is to understand what we know and what we need to know about today s and tomorrow s technology to track the explosive development of our field and its broadening range of applications to sort through the details which compete for our attention and to perceive underlying trends A key

development in the past year was the rapid and widespread acceptance by all user segments of personal computer based CAD CAM workstations coupled with widespread use of software packages both those developed for PC based workstations and others converted from main frame and mini systems for use on PC based or 32 bit workstations If this trend continues for a few more years as much as 900 0 of all design work may be accomplished on advanced versions of PC based workstations Many software systems vendors unknown until recently to the PC based CAD CAM community have now come to dominate the market companies such as Autodesk Chessell Robocom Future Net T W Systems P CAD Cascade 4 D Graphics CADAM Wang Hornbuckle and more than 20 other companies who sell PC based CAD CAM software Proceedings ,1979

**Product Data Interfaces in CAD/CAM Applications** J. Encarnacao,R. Schuster,E. Vöge,2012-12-06 Interest in product data exchange and interfaces in the CAD CAM area is steadily growing The rapidly increasing graphics applications in engineering and science has led to a great variety of heterogeneous hardware and software products This has become a major obstacle in the progress of systems integration To improve this situation CAD CAM users have called for specification and implementation of standardized product data interfaces These needs resulted in the definition of preliminary standards in this area Since 1975 activities have been concentrated on developing standards for three major areas computer graphics sculptured surfaces and data exchange for engineering drawings The Graphical Kernel System GKS has been accepted as an international standard for graphics programming in 1984 Y14 26M IGES was adopted as an American Standard in 1981 and the VDA Surface Interface VDAFS has been accepted by the German National Standardization Institute DIN NAM 96 4 Although considerable progress has been achieved the complexity of the subject and the dynamics of the CAD CAM development still calls for more generality and compatibility of the interfaces This has resulted in an international discussion on further improvements of the standards The major goal of this book is to bring together the different views and experiences in industry and university in the area of Product Data Interfaces thereby contributing to the ongoing work in improving the state of the art

**Interactive Graphics in CAD** Y. Gardan,Lucas,2012-12-06 In a society in which the use of information technology is becoming commonplace it is natural that pictures and images produced by electronic means should be increasing in importance as a means of communication Computer graphics have only recently come to the attention of the general public mainly through animated drawings advertisements and video games The quality of the pictures is often such that unless informed of the fact people are unaware that they are created with the help of computers Some simulations those developed in connection with the space shuttle for example represent a great and rapid progress In industry computer graphic techniques are used not only for the presentation of business data but also in design and manufacture processes Such computer assisted systems are collectively represented by the acronym CAX In CAD CAM computer assisted design manufacture interactive graphic techniques have attained considerable importance In CAD CAM systems a dialogue can be established between the user and the machine using a variety of easy to operate communication devices Due to the recent

developments in hardware and software for modelling visual display etc a designer is now able to make decisions based on the information presented plans perspective drawings graphics etc with the help of interactive graphic techniques These constitute the most visible and perhaps most spectacular aspect of CAD CAM systems
