Computers And The School Library:

Technology and the School Library Odin L. Jurkowski, 2010-05-11 For school librarians technology has become an essential component of their work To meet the growing need in this area Odin Jurkowski wrote *Technology and the School Library* in 2006 To address the rapidly and continually changing advancements in technology however a more current text is needed In this revised edition Jurkowski provides an overview of the types of technologies used in school libraries from traditional low tech options to the latest developments describing how the school librarian interacts with and works with the technology Updated throughout this edition addresses the continuously changing nature of technology including a new chapter covering web 2 0 tools and their use in education Major topics covered in this volume include information resources in the school library the different varieties of educational software available resources available via the web and the importance of creating a school library web site This book also addresses tools that can be used in classrooms and technology administration everything from automation and filters to security on student computers and security systems in general

Computers and the School Library Linworth Publishing, Inc. Staff, 1991 *Technology for the School Librarian* William O. Scheeren, 2010-01-22 The world of the school librarian has changed significantly over the past ten years with the proliferation of technology into all phases of education this book attempts to address these issues What does a school librarian need to know about technology *Technology for the School Librarian Theory and Practice* is an introduction to all aspects of technology in the school library and provides a starting point for further study of this wide ranging and critically important field The only book that addresses both the theoretical and the practical aspects of the subject *Technology for the School Librarian* is organized into 13 chapters describing the most vital topics in technology for school librarians Within these chapters school librarians whether practicing or prospective will be introduced to the practical aspects of technology in the school library and presented with a theoretical framework that will allow them to continue their research and learning Case studies facilitate understanding as do the study questions included with each chapter *Computers and School Libraries* Laurel Clyde, D. Joan Joyce, 1983 This bibliography provides a guide to the literature available as of August 1983 on computers particularly microcomputers and school libraries References include annotations of articles books papers and reports written in English and some nonprint materials many citations are from Australian publications The selection organization and use of computers and computer software in school libraries are covered including such administrative functions as circulation indexing cataloging and record keeping and the use of computers as educational resources General works on computers useful to the school librarian are also cited Entries are presented in one alphabetical sequence by author and provide information on author title place of publication date and page numbers where applicable Annotations indicate the scope and content of the work and in some cases provide evaluative comment Where appropriate references are made to works which are similar in scope and coverage or which provide background information or a different perspective on the

topic Subject and author indexes are included as well as a glossary of acronyms and abbreviations and a list of journals cited LMM School Librarians and the Technology Department Mary Ann Bell, Holly Weimar, James Van Roekel, 2013-05-23 This handbook provides librarians and technology specialists with the tools to understand the issues and challenges related to their counterparts jobs and find ways to work together for the betterment of all concerned School Librarians and the Technology Department A Practical Guide to Successful Collaboration was inspired by the authors collective realization that far too often librarians and technology specialists fail to collaborate successfully and sometimes even find their groups at odds with one another This book is the antidote it is a powerful call to establish and improve relationships between the two for the benefit of the students as well as the librarians and technology specialists themselves The book begins by providing background information about the history of librarianship and the use of computer technology in schools The authors trace the origins of the positions related to educational technology such as technology specialist teacher and director The following chapters describe and address specific concerns of both librarians and technology specialists Most importantly this collaborative work offers practical suggestions for cooperation between these two groups of educators as they work together to offer the best possible materials and instructions to students School Librarians and the Technology Department concludes by hypothesizing what the future holds in the realms of librarianship and technology in this rapidly changing information age
