Statistical Computer Performance Evaluation Walter F. Freiberger,1972 The purpose of this conference was to investigate a new and promising field in computer science the application of quantitative and particularly statistical methods to the study of computer performance The present state of the art is that on one hand is a wealth of data if gathered in a rather haphazard fashion on the other hand are theoretical models whose stringent assumptions are not examined and whose conclusions are not verified The papers accepted attempt to deal with real data in a reasonably sophisticated manner The
