Steve Dixon

Dance In Cyberspace:

Cinderella's Cyber Slippers F.G. Cardin, Ella's life is a digital nightmare. Stuck working for her demanding stepmother and two vapid stepsisters, her only escape is coding and her anonymous online gaming community. When a virtual reality gala hosted by the enigmatic Prince Charming of the gaming world is announced, Ella secretly creates the perfect avatar and logs in. But when a glitch causes her to lose her connection at midnight, she leaves behind only a single, unique digital slipper. Can the Prince track down the mysterious gamer who stole his heart? *Cinderella's Cyber Slippers* is a charming and hilarious modern twist on a classic fairytale, perfect for anyone who's ever dreamed of finding love in the digital age. *Digital Performance* Steve Dixon, 2007-02-23. The historical roots, key practitioners, and artistic, theoretical, and technological trends in the incorporation of new media into the performing arts. The past decade has seen an extraordinarily intense period of experimentation with computer technology within the performing arts. Digital media has been increasingly incorporated into live theater and dance, and new forms of interactive performance have emerged in participatory installations on CD-ROM and on the Web. In *Digital Performance*, Steve Dixon traces the evolution of these practices, presents detailed accounts of key practitioners and performances, and analyzes the theoretical, artistic, and technological contexts of this form of new media art. Dixon finds precursors to today's digital performances in past forms of theatrical technology that range from the *deus ex machina* of classical Greek drama to Wagner's *Gesamtkunstwerk* concept of the total artwork, and draws parallels between contemporary work and the theories and practices of Constructivism, Dada, Surrealism, Expressionism, Futurism, and multimedia pioneers of the twentieth century. For a theoretical perspective on digital performance, Dixon draws on the work of Philip Auslander, Walter Benjamin, Roland Barthes, Jean Baudrillard, and others. To document and analyze contemporary digital performance practice, Dixon considers changes in the representation of the body, space, and time. He considers virtual bodies, avatars, and digital doubles, as well as performances by artists including Stelarc, Robert Lepage, Merce Cunningham, Laurie Anderson, Blast Theory, and Eduardo Kac. He investigates new media's novel approaches to creating theatrical spectacle, including virtual reality and robot performance, work, telematic performances in which remote locations are linked in real time, Webcams, and online drama communities, and considers the extratemporal illusion created by some technological theater works. Finally, he defines categories of interactivity from navigational to participatory and collaborative. Dixon challenges dominant theoretical approaches to digital performance, including what he calls postmodernism's denial of the new, and offers a series of boldly original arguments in their place. *Résumés in Cyberspace* Pat Criscito, 2000.
